## **Forests Business Sustainability Earthscan Library:**

Forests, Business and Sustainability Rajat Panwar, Robert Kozak, Eric Hansen, 2015-12-14 Forests are under tremendous pressure from human uses of all kinds and one of the most significant threats to their sustainability comes from commercial interests This book presents a comprehensive examination of the interactions between the forest products sector and the sustainability of forests It captures the most current sustainability concerns within the forestry sector and various sustainability oriented initiatives to address these Experts from around the world analyze interconnected topics including market mechanisms regulatory mechanisms voluntary actions and governance and outline their effectiveness potential and limitations By presenting a novel overview of the burgeoning field of business sustainability within the forestry sector this book paves a way forward in understanding what is working what is not working and what could potentially work to ensure sustainable business practices within the forestry sector

**Sustainable Forest Management** John L. Innes, Anna V. Tikina, 2016-12-19 Sustainable Forest Management provides the necessary material to educate students about forestry and the contemporary role of forests in ecosystems and society This comprehensive textbook on the concept and practice of sustainable forest management sets the standard for practice worldwide Early chapters concentrate on conceptual aspects relating sustainable forestry management to international policy In particular they consider the concept of criteria and indicators and how this has determined the practice of forest management taken here to be the management of forested lands and of all ecosystems present on such lands Later chapters are more practical in focus concentrating on the management of the many values associated with forests Overall the book provides a major new synthesis which will serve as a textbook for undergraduates of forestry as well as those from related disciplines such as ecology or geography who are taking a course in forests or natural resource management

*The Future Use of Nordic Forests* Erik Westholm, Karin Beland Lindahl, Florian Kraxner, 2015-02-16 Diverse as they are in their histories and in the organization of their forest sectors most Nordic countries have this in common their economies and cultures are substantially based on the utilization of various forest resources This book explores Nordic forest futures and presents research results that form part of a scientific foundation for considering how to balance the functions of forests It is particularly concerned with global trends that may affect the future use of boreal forests Chapters investigate inter alia the growing world population and the expected economic growth in countries with huge populations and assess the resulting pressure on all land based resources Authors examine the urgent need for solutions to the energy crisis consider worrying climate scenarios and provide a global outlook on bioenergy futures Readers will discover how these developments will and must influence long term strategic decisions on the future use of Nordic forests The challenges and possible responses for future forest governance and forestry issues emerge as the chapters go on to consider the multiple pressures in particular on the Swedish Forestry Model among other themes By bringing together a distinguished group of internationally renowned scientists representing a diverse set of

disciplines covering political science geography rural development forest economics history and geo sciences this book constitutes an exceptionally profound and thoughtful futures study Alexander Buck Executive Director International Union of Forest Research Organizations IUFRO

**Gender and Forests** Carol J. Pierce Colfer, Bimbika Sijapati Basnett, Marlène Elias, 2016-04-14 This enlightening book brings together the work of gender and forestry specialists from various backgrounds and fields of research and action to analyse global gender conditions as related to forests Using a variety of methods and approaches they build on a spectrum of theoretical perspectives to bring depth and breadth to the relevant issues and address timely and under studied themes Focusing particularly on tropical forests the book presents both local case studies and global comparative studies from Africa Asia and Latin America as well as the US and Europe The studies range from personal histories of elderly American women s attitudes toward conservation to a combined qualitative quantitative international comparative study on REDD to a longitudinal examination of oil palm and gender roles over time in Kalimantan Issues are examined across scales from the household to the nation state and the global arena and reach back to the past to inform present and future considerations The collection will be of relevance to academics researchers policy makers and advocates with different levels of familiarity with gender issues in the field of forestry

**Forests in Landscapes** Stewart Maginnis, Jeffrey A Sayer, 2013-06-17 At last a really useful book telling us how all the rhetoric about ecosystem approaches and sustainable forest management is being translated into practical solutions on the ground CLAUDE MARTIN WWF INTERNATIONAL For too long foresters have seen forests as logs waiting to be turned into something useful This book demonstrates that forests in fact have multiple values and managing them as ecosystems will bring more benefits to a greater cross section of the public JEFFREY A MCNEELY CHIEF SCIENTIST IUCN This book demonstrates that ecosystem approaches and sustainable forest management are neither alternative methods of forest management nor are they simply complicated ways of saying the same thing They are both emerging concepts for more integrated and holistic ways of managing forests within larger landscapes in ways that optimize benefits to all stakeholders ACHIM STEINER AND IAN JOHNSON FROM THE FOREWORD Recent innovations in Sustainable Forest Management and Ecosystem Approaches are resulting in forests increasingly being managed as part of the broader social ecological systems in which they exist Forests in Landscapes reviews changes that have occurred in forest management in recent decades Case studies from Europe Canada the United States Russia Australia the Congo and Central America provide a wealth of international examples of innovative practices Cross cutting chapters examine the political ecology and economics of forest management and review the information needs and the use and misuse of criteria and indicators to achieve broad societal goals for forests A concluding chapter draws out the key lessons of changes in forest management in recent decades and sets out some thoughts for the future This book is a must read for practitioners researchers and policy makers concerned with forests and land use It contains lessons for all those concerned with forests as sources of people s livelihoods and as part of rural landscapes

Published with IUCN and PROFOR      **Selling Forest Environmental Services** Joshua Bishop, Stefano Pagiola, 2012-04-27  
 The risks posed by forest destruction throughout the world are highly significant for all Not only are forests a critical source of timber and non timber forest products but they provide environmental services that are the basis of life on Earth However only rarely do beneficiaries pay for the goods and services they experience and there are severe consequences as a result for the poor and for the forests themselves It has proved difficult to translate the theory of market based approaches into practice Based on extensive research and case studies of biodiversity conservation watershed protected and carbon sequestration this book demonstrates how payment systems can be established in practice their effectiveness and their implications for the poor      *Instant Insights: Sustainable forest management* Prof Francis E. Putz, Dr Ian D. Thompson, Prof. Philip J. Burton, Dr James Sandom, Dr Paolo Omar Cerutti, Dr Robert Nasi, Dr Yamina Micaela Rosas, Dr Pablo Luis Peri, Dr Héctor Bahamonde, Dr Juan Manuel Cellini, Dr Marcelo Daniel Barrera, Dr Alejandro Huertas Herrera, Dr María Vanessa Lencinas, Dr Guillermo Martínez Pastur, 2022-06-14 This collection features five peer reviewed literature reviews on sustainable forest management The first chapter discusses the varying definitions of sustainable forest management SFM in tropical landscapes as well as the trade offs associated with SFM The chapter also reviews the spatial scales of assessing SFM and explores expanding the scope of SFM from individual strands to forested landscapes The second chapter provides a comprehensive review of the current research undertaken in sustainable forestry It considers the concept and evolution of sustainable forestry and the challenges which arise as a result of implementing SFM practices The third chapter reviews the role and impact of forest certification schemes in the achievement of SFM The chapter summarises the wealth of research available on the development of forest certification and how individual elements can be optimised to further improve the model The fourth chapter discusses the recent history and implementation challenges of SFM across the Congo Basin including logging concessions land zones and the processes and institutions required to implement effective SFM policies The final chapter analyses the potential trade offs between ecosystem services and biodiversity in the southern Patagonian forests The chapter explores the implementation of SFM as a strategy to mitigate these trade offs at a landscape level
