Fortifications Of Verdun 1874 1917 Fortress:

The Fortifications of Verdun 1874-1917 Clayton Donnell, 2012-08-20 The ring of fortifications protecting the city of Verdun on the Meuse River would become critical in the infamous battle of World War I This book examines these fortifications including the famous forts of Douaumont and Vaux that saw some of the fiercest fighting during the battle

The Hindenburg Line Patrick R. Osborn, Marc Romanych, 2016-10-20 Jagging across north western Europe like an ugly scar the Hindenburg Line was Germany's most formidable line of defence in World War I Its fearsome reputation was matched only by its cunning design with deep zigzagging trenches concrete fieldworks barbed wire and devilish booby traps forming an intimidating barrier for any attacking army Through meticulous research this volume explores each of the major portions of the Hindenburg Line paying particular attention to three examples of Allied operations against it towards the end of the war the critical flanking of the Drocourt Qeant Switch the daring but costly rupture of the line of the St Quentin Canal and the bloody battles of the Meuse Argonne Specially commissioned artwork and historical photographs perfectly complement the analysis provided by the authors as they trace the life of the Hindenburg Line from its seemingly invulnerable early years through to the audacious tactics used by the Allies to achieve a bitter victory in 1918 **French**

Soldier vs German Soldier David Campbell, 2020-03-19 On 21 February 1916 the German Army launched a major attack on the French fortress of Verdun The Germans were confident that the ensuing battle would compel France to expend its strategic reserves in a savage attritional battle thereby wearing down Allied fighting power on the Western Front However initial German success in capturing a key early objective Fort Douaumont was swiftly stemmed by the French defences despite heavy French casualties The Germans then switched objectives but made slow progress towards their goals by July the battle had become a stalemate During the protracted struggle for Verdun the two sides infantrymen faced appalling battlefield conditions their training equipment and doctrine would be tested to the limit and beyond New technologies including flamethrowers hand grenades trench mortars and more mobile machine guns would play a key role in the hands of infantry specialists thrown into the developing battle and innovations in combat communications were employed to overcome the confusion of the battlefield This study outlines the two sides wider approach to the evolving battle before assessing the preparations and combat record of the French and German fighting men who fought one another during three pivotal moments of the 101 2 month struggle for Verdun **42cm 'Big Bertha' and German Siege Artillery of World War I**

Marc Romanych, Martin Rupp, 2014-01-20 In the early days of World War I Germany unveiled a new weapon the mobile 42cm 16 5 inch M Ger t howitzer At the time it was the largest artillery piece of its kind in the world and a closely guarded secret When war broke out two of the howitzers were rushed directly from the factory to Liege where they quickly destroyed two forts and compelled the fortress to surrender After repeat performances at Namur Maubeuge and Antwerp German soldiers christened the howitzers Grosse or Dicke Berta Fat or Big Bertha after Bertha von Krupp owner of the Krupp armament

works that built the howitzers The nickname was soon picked up by German press which triumphed the 42cm howitzers as Wunderwaffe wonder weapons and the legend of Big Bertha was born This book details the design and development of German siege guns before and during World War I Accompanying the text are many rare never before published photographs of Big Bertha and the other German siege guns Colour illustrations depict the most important aspects of the German siege artillery

The Guarded Age David J. Betz,2023-10-25 The fall of the Berlin Wall in 1989 came to symbolize the dawn of a new era of openness and connectivity Yet today the world is ever more divided demarcated and quite literally fortified We are living in a guarded age Why and how has this happened Where will it take us In this book David J Betz explores the expansion of fortified physical infrastructure at every level of the global political economy In cities where security is increasingly designed in to public buildings and spaces as they are reshaped to mitigate mass terror attacks Within corporations who are burying their electronic assets in deep underground caverns and behind the leaded walls of ex nuclear war bunkers against a range of threats and feared contingencies In many urban areas where the default condition of civil life is to be walled gated watched and guarded Year after year hundreds of miles of linear obstacles walls ditches and watchtowers are added to national borders Practically everywhere you look there are signs of innovative fortification often designed to be overlooked The Guarded Age reveals the barriers which most have observed but few until reading this book have truly seen

Concrete,1922 **Concrete** Harvey Whipple,1922 **Concrete-cement Age** ,1922 The New Larned History for Ready Reference, Reading and Research Josephus Nelson Larned,1924 **Maginot Line Gun Turrets** Clayton Donnell,2017-09-21 The Maginot Line was one of the most advanced networks of fortifications in history Built in the aftermath of World War I and stretching along the French eastern border from Belgium to Switzerland it was designed to prevent German troops from ever setting foot on French soil again Its primary defensive weapons were the gun turrets Beginning development in the 1870s and improving on German designs they were constructed out of steel wedges and could revolve and disappear from sight after firing making them impervious to enemy bombardment They were deadly accurate and created havoc on the German units that attacked the line during their invasion of France in 1940 This fully illustrated study will examine the technical details of the French artillery turrets It will show the evolution of the design of the guns and turrets used in the French forts before and during World War I then those built exclusively for the Maginot Line to give a comprehensive overview of the weapons designed to protect France from invasion
