Foreign Aid Diplomacy Development Domestic Politics:

Foreign Aid Carol Lancaster, 2008-09-15 A twentieth century innovation foreign aid has become a familiar and even expected element in international relations But scholars and government officials continue to debate why countries provide it some claim that it is primarily a tool of diplomacy some argue that it is largely intended to support development in poor countries and still others point out its myriad newer uses Carol Lancaster effectively puts this dispute to rest here by providing the most comprehensive answer yet to the question of why governments give foreign aid She argues that because of domestic politics in aid giving countries it has always been and will continue to be used to achieve a mixture of different goals Drawing on her expertise in both comparative politics and international relations and on her experience as a former public official Lancaster provides five in depth case studies the United States Japan France Germany and Denmark that demonstrate how domestic politics and international pressures combine to shape how and why donor governments give aid In doing so she explores the impact on foreign aid of political institutions interest groups and the ways governments organize their giving Her findings provide essential insight for scholars of international relations and comparative politics as well as anyone involved with foreign aid or foreign policy

Theory and Politics of Foreign Aid in the United States Alice Greschkow, 2017-08-14 Seminar paper from the year 2013 in the subject Politics Topic Peace and Conflict Security grade 1.0 University of Wroclaw language English abstract This term paper deals with the question if development assistance can be seen as an effective response to global terrorism after the September 11 attacks However the main focus will be set on the foreign aid of the USA since the direct political reactions after the terrorist attacks had a bigger impact than the ones of the European Union or other states in spite of the terrorist attacks in London and Madrid Furthermore it is important to focus on a rather narrow and clear aspect in order to achieve a deepened discourse instead of a superficial catch all debate which could not be provided properly with the formal limitations of this paper anyway In order to answer the question in the following chapter will be briefly described how US aid was provided before 9 11 including the most important countries and methods applied to achieve the goals Afterwards the shift of perspective in foreign policy and the related aid allocation will be presented while the increased effort and the outcomes will be portrayed Finally concluding remarks will summarize the findings and arguments of this essay The Al Qaeda terrorist attacks against the United States of America on September 11th 2001 changed worldwide political dynamics and the perception of political challenges and issues in regions in which mainly Muslims live The symbolic attack of the extremists against the Western world opened the debate why such hatred developed and more important how the repetition of such events could be avoided in the future While the Bush administration quickly and publicly decided to intervene militarily in Iraq and Afghanistan in order to find the responsible ones behind the attacks it has been concluded as well to work on the security of US citizens through development assistance Reconciliation the promotion of democracy and the increase of the education level in regions in which Muslim extremist were trained and

radicalized have been perceived as key aspects of the war on terror going beyond the military classic concept of war. Nevertheless, military forces have spent more than a decade in Afghanistan and left Iraq earlier with a poor administrative state. A possible connection between violence attacks and humiliation and the present forces supposedly has been observed by the Muslim community after cases of torture by soldiers became public, which appears to be a contradiction to the noble goal of the promotion of peace, freedom, and security.

Current Challenges to Peacebuilding Efforts and Development Assistance Konrad Pędziwiatr, 2011.

Development Policies of Central and Eastern European States Ondřej Horký-Hlucháň, Simon Lightfoot, 2013-09-13. The states from Central and Eastern Europe that joined the EU in 2004 and 2007 provide a fascinating series of case studies for scholars interested in politics, IR, and development studies. The interest comes from the fact that never before had so many recipients of EU aid joined the Union and taken on the commitment to become aid donors. The journey from recipients of aid to aid donors is interesting because not only does it tell us about development policy in CEE states, this policy area gives us an insight into governmental structures in CEE states, foreign policy priorities, public opinion, the role of NGOs, civil society, and how well CEE states have taken on board the EU acquis, the EU's rule book. The book also explores whether the development cooperation programmes of the majority of CEEs reflect the so-called transition experience of moving from authoritarianism and socialism to democracy and modern liberalism. It also explores the extent to which these donors are aligned with the approaches of the DAC donors. Finally, by extending the scrutiny to the bottom-up development activities of non-state actors and public opinion, the book will analyse the dynamics of the solidarity of the former East with the global South. This book was published as a special issue of *Perspectives on European Politics and Society*.

Western Financial Assistance to the Developing World Chuku-Dinka R. Spencer, 2016-08-05. This unconventional book addresses the imbalance of power between countries that give and receive funds for international financial development, with particular attention to the outcomes and impacts of this imbalance on recipient countries. It

provides an in depth analysis of the perceptions that population segments of recipient countries have of the power plays inherent in giving and receiving financial assistance delving deep into the factors that affect these perceptions to examine how and why developed countries wield power over countries receiving financial assistance While the text focuses primarily on African countries it also addresses the broader power imbalance between developed countries in the global north and developing countries in the global south It also examines perceptions of development assistance and power imbalance between the global south in general and the BRICS countries which provide assistance to the global south in particular This book is an ideal tool for those studying the socioeconomic impacts of international financial assistance to developing countries

New Europe's New Development Aid Balázs Szent-Iványi, Simon Lightfoot, 2015-04-17 This book examines the international development policies of five East Central European new EU member states the Czech Republic Hungary Poland Slovakia and Slovenia These countries turned from being aid recipients to donors after the turn of the millennium in the run up to EU accession in 2004 The book explains the evolution subsequent to EU accession and current state of foreign aid policies in the region and the reasons why these deviate from many of the internationally agreed best practices in development cooperation It argues that after the turn of the millennium a Global Consensus has emerged on how to make foreign aid more effective for development A comparison between the elements of the Global Consensus and the performance of the five countries reveals that while they have generally implemented little of these recommendations there are also emerging differences between the countries with the Czech Republic and Slovenia clearly aspiring to become globally responsible donors Building on the literatures on foreign policy analysis international socialization and interest group influence the book develops a model of foreign aid policy making in order to explain the general reluctance of the five countries in implementing international best practices and also the differences in their relative performance

China's Education Aid to Africa Wei Ye, 2023-05-31. China's rise as an aid provider in Africa has caught global attention, with China's activity being viewed as the projection of soft power of a neo-colonialist kind in an international relations context. This book, which focuses on China's education aid, government scholarships, training, Confucius Institutes, dispatched teachers, etc., reveals a much more complicated picture. It outlines how the divide between the Chinese Ministry of Commerce and the Ministry of Education hinders China's soft power projection, how much of China's aid is bound up with an education for economic growth outlook mirroring China's own recent experiences of economic development, and how China's aid prioritized to reflect the commercial sector's interests is out of step with most international development aid, which is dominated by education agendas and the campaigns of international organizations and traditional donors. This leaves China easily exposed to the charge of neo-colonialism. This situation also reveals insufficient knowledge production of China and in South-South Cooperation. Substantial production of Southern knowledge should recognize the international development cooperation architecture as an open system by which both traditional donors and Southern countries transform.

South Korea's Foreign Aid Hyo-sook Kim, 2021-12-28. Kim examines the impact of domestic politics in accomplishing South Korea's middle power diplomacy through the provision of foreign aid. Since the 2000s, the rise of emerging nations as donors has brought about a remarkable transition in the international development community. South Korea has closed the gap with other Development Assistance Committee donors in terms of the quality of its aid. In doing so, it has taken on a more active role as a middle power acting as an agenda setter and a mediator in the field of development and many other wide policy areas, including trade, finance, environment, security, and peacekeeping. What factors then have encouraged South Korea to maintain and enhance the existing international development system? Not only how they behave but also how their behaviour is determined is essential to truly understand the impact of emerging donors on the existing order. Kim highlights the significance of domestic politics in determining South Korea's foreign aid behaviour, framing it in terms of South Korea's wider middle power diplomatic strategy. This book will be of great value to scholars of South Korean politics and foreign policy, as well as to international relations scholars with an

interest in the foreign aid policy of middle powers *Reinventing Foreign Aid* William Easterly, 2008 Discusses how to improve the effectiveness of foreign aid proposing practical solutions to specific problems rather than a utopian master plan This work also includes writers who look at scientific evaluation of aid projects and describe projects found to be cost effective including vaccine delivery and HIV education *The Development of Aid* Gerard Van Bilzen, 2015 Annotation Describing the different aid forms of the last 65 years and analysing why aid changed from time to time are the subjects of this book Professionals and students in the area of international cooperation will benefit from studying this history as at this moment old concepts are reappearing or applied by new donors like China University of British Columbia Law Review University of British Columbia, 2015 *Foreign Aid and Growth Nexus in Pakistan* Muhammad Javid, Abdul Qayyum, 2011
