Foreign Aid Emerging Powers Perspectives:

Foreign Aid and Emerging Powers Iain Watson, 2014-07-11 Current debates on emerging powers as foreign aid donors often fail to examine the myriad geopolitical, geoeconomic and geocultural tensions that influence policies of Official Development Assistance (ODA). This book advocates a regional geopolitical approach to explaining donor relationships and provides a multidisciplinary critical assessment of the contemporary debates on emerging powers and foreign aid, bringing together economic and geopolitical approaches in the light of the 2015 completion of the Millennium Development Goals (MDGs). Moving away from established debates, assessing the advantages and disadvantages of foreign aid, this book challenges the current geopolitical assumptions of the emerging powers concerning issues such as south-south solidarity, shared development experience and multipolarity. It analyses how donor governments sell aid to recipients through enabling different cultural assumptions and soft power narratives of national identity and provides empirical evidence on agendas such as aid effectiveness, aid for trade, public-private partnerships and green growth aid. The book examines the role of and relationships between the leading traditional and emerging power Asian donors specifically and explores the different and contested perspectives and patterns of ODA policy through an alternative account of emerging power foreign aid to leading African and Asian recipients. This book provides a valuable resource for postgraduate students and practitioners across disciplines such as development economics and geopolitics of development, uniquely approaching the debate from the perspective of emerging powers and donors.

Development Cooperation and Emerging Powers Sachin Chaturvedi, Thomas Fues, Elizabeth Sidiropoulos, 2012-05-10 The current framework of development cooperation is dominated by the experiences of industrialized countries. But emerging economies have begun to accelerate their own development programmes and attempts to bring them into existing aid models have been met with caution and reservation. This expert topical volume explores the development policies of Brazil, China, India, Mexico and South Africa, analysing how South-South cooperation has evolved and where it differs from traditional development cooperation. This vital new collection brings together first-hand experience from these countries to provide a forward-looking analysis of the current global architecture of development cooperation and of the possible convergence of traditional and emerging development actors.

Japanese Development Cooperation André Asplund, Marie Soderberg, 2016-12-19 The world order as we know it is currently undergoing profound changes and in its wake so is foreign aid. Donors of foreign aid, development assistance or development cooperation around the world are already facing new challenges in the changing development architecture. This is an architecture that globally seems to become increasingly forgiving of foreign aid as a win-win concept that also meets the donors' own national interests, something that has been an unofficial Japanese trademark for many years. This book examines Japan's development assistance as it transitions away from Official Development Assistance and towards Development Cooperation. In this transition, the strong and reciprocal relationships between Japanese development policy and

comprehensive security diplomacy foreign domestic and economic policies are likely to become even more consolidated and integrated The utilization of and changes within Japanese development policy therefore affects not only recipients of foreign aid but also the relationships Japan enjoys with its allies and strategic partners as well as the relations to competing donors and rivals in the region and around the world Japanese foreign aid as such provides an extremely interesting case from where regional and even global changes can be understood Written by a multidisciplinary team of contributors from the fields of political science international relations development economics public opinion and Japan studies the book sets out to be innovative in capturing the essence of the changing patterns of development cooperation and more importantly Japan's role in within it in an era of great change This book will be of great interest to students and scholars of Japanese Politics Foreign Policy and International Relations *Locating India in the Global Development Assistance Architecture* Uma Purushothaman, 2025-02-03 This book explores the intricate web of global development assistance dissecting India's unique position within this dynamic landscape to study the country's evolving role in International Development The subject matter traces India's trajectory from its early years as a recipient of foreign aid to its emergence as a key player in providing assistance to other nations It also examines the motivations and challenges that shape India's engagement in the global development arena Presenting a detailed analysis of India's responsibilities aspirations and the evolving nature of global aid this book is aimed at scholars policymakers and anyone seeking a broad understanding of India's role in shaping the global development narrative Print edition not for sale in South Asia India Sri Lanka Nepal Bangladesh Pakistan and Bhutan
