The Iowa Lakeside Laboratory Michael J. Lannoo,2012-11-15 Imagine a place dedicated to the long term study of nature in nature a permanent biological field station a teaching and research laboratory that promotes complete immersion in the natural world Lakeside Laboratory founded on the shore of Lake Okoboji in northwestern Iowa in 1909 is just such a place In this remarkable and insightful book Michael Lannoo sets the story of Lakeside Lab within the larger story of the primacy of fieldwork the emergence of conservation biology and the ability of field stations to address such growing problems as pollution disease habitat loss invasive species and climate change At the intersection of major ecosystems with distinct plant and animal communities and surrounded by what ironically may be the most intensely cultivated landscape on earth Lakeside has a long history of rubber boot biologists saturated in the spirit that grounds the new discipline of conservation biology and Lannoo brings this history to life with his descriptions of the people and ideas that shaped it Lakeside s continuing commitment to bringing the laboratory to the field rather than bringing the field to the lab has supported a focus on mammalogy ornithology herpetology ichthyology invertebrate biology parasitology limnology and algology subjects rarely taught now on university campuses but crucial to the planet s health Today s huge array of environmental problems can best be solved by people who have learned about nature within nature at a place with a long history of research and observation people who thoroughly understand and appreciate nature s cogs and wheels Lakeside Lab and biological research stations like it have never been more relevant to science and to society at large than they are today Michael Lannoo convinces us that while Lakeside s past is commendable its future grounded in ecological principles will help shape a more sustainable society
