Quality Drying in a Hardwood Lumber Predryer Eugene M. Wengert, 1993 The IMPROVE Lumber Drying Program is intended to increase awareness of the lumber drying system as a critical component in the manufacture of quality lumber One objective of the program is to provide easy to use tools that a kiln predryer operator can use to maintain an efficient drying operation and therefore improve lumber drying quality This report is one component of the IMPROVE Program It is a guidebook checklist for quality drying in a hardwood lumber predryer that kiln predryer operators or owners can use to readily evaluate how well their operations rate on those factors that most strongly affect drying quality with particular emphasis on predryer operation and maintenance and lumber handling Appendix 1 contains a shortened version of the checklist for easy duplication and filing Appendix 2 contains the same checklist items however the information is arranged by drying system components for convenience in checking individual components
