The Science of Climbing Training Sergio Consuegra, 2023-02-02 When it comes to training for climbing there is an overwhelming amount of information out there In The Science of Climbing Training top Spanish climbing coach Sergio Consuegra has analysed our sporting needs from the perspective of exercise and sports science to provide an evidence based approach to training for climbing It is designed to help us improve climbing performance whether we re taking the next step in our training as we work towards a project or if we re a coach looking to optimise our athletes training It doesn t contain any magic training methods because there are none although you might be shocked by the science behind some popular methods The first part explains what training is and how different training methods are governed by the physiological and biomechanical processes that occur in the body The second part looks at how to improve specific needs such as finger strength and forearm muscle endurance and general needs such as basic physical conditioning pulling strength pushing strength strength training for injury prevention for the different demands and types of climbing and bouldering The third and final part suggests the best ways to fit it all together It looks at adjusting training volume and intensity and tapering to encourage supercompensation all to help us achieve improved performance whether it s a breaking into a higher grade ticking that long standing project or climbing a dream route *MANUAL DEL MEZIERISTA, EL (Tomo I)* Godelieve

Tratado de Medicina del trabajo Fernando Gil Hernández, 2024-08-14. Los 46 capítulos de los que consta el tratado han sido revisados y actualizados en profundidad; algunos se han fusionado, otros han sido redactados por autores distintos respecto de las ediciones previas y por último se ha añadido uno nuevo relativo a la salud laboral y la mujer, así como al impacto de las condiciones laborales sobre la fertilidad y el embarazo. Numerosos capítulos: accidente de trabajo y enfermedad profesional, incapacidad laboral, valoración del daño, derecho sanitario, derecho laboral, patologías emergentes, etc., adquieren especial relevancia en torno a la pericial en salud ocupacional y prevención de riesgos laborales, de ahí su evidente utilidad práctica para los profesionales del Derecho Laboral o materias afines, graduados en Ciencias del Trabajo y técnicos en Prevención de Riesgos Laborales. Se han seleccionado aquellos temas relativos a la seguridad en el trabajo, la higiene industrial, la ergonomía y la psicología que mayor repercusión tienen en la génesis de las patologías. Así, este tratado se centra en la vigilancia de la salud, tarea por excelencia de los Servicios de Prevención para conseguir que las empresas sean más saludables. Tratado de Medicina del Trabajo, resultado de especial interés para los residentes de Medicina y Enfermería del Trabajo, cuya formación se integra actualmente en las unidades multiprofesionales de medicina y enfermería del trabajo y que desarrollan su actividad en las empresas, las mutuas colaboradoras de la Seguridad Social o los Servicios de Prevención. Por todo ello se incluyen la clínica patológica laboral que afecta a los diferentes órganos y sistemas del organismo humano, la toxicología industrial y otros aspectos de interés en la vigilancia de la salud, como son la genética aplicada a la salud laboral, la investigación en Medicina del Trabajo, los protocolos de vigilancia de la salud y la documentación y la organización de la salud laboral en un Servicio de Prevención. Aborda además otras especialidades relacionadas con el medio laboral, como la reumatología o la cardiología, que aportan patologías de alta prevalencia entre la población trabajadora. La cuarta edición de Tratado de Medicina del Trabajo nace con el objetivo de contemplar aquellos cambios legislativos y conceptuales que ha habido en materia de prevención de riesgos laborales y de salud laboral desde que en 2018 apareciera la tercera. La voluntad del coordinador de la obra es que esta nueva edición siga siendo en un sentido amplio una guía formativa, didáctica y práctica para profesionales relacionados con la salud laboral.
