PHONICS SURVEY

CORE Phonics Survey adapted to align with SD36 Phonics Scope & Sequence

CORE
Commitment to Reading Excellence in Education

WHAT?

This phonics survey assesses the phonics and phonics-related skills that have a high rate of application in beginning reading. The survey presents a number of lists of letters and words for the student to identify and decode. Pseudowords, or made-up words, are included since the student must use decoding skills to correctly pronounce these words and cannot have memorized them.

This survey can be used as a screening measure, and also as an outcome measure, providing data about growth and mastery at the end of an instructional period. As a diagnostic, it can indicate whether or not a student needs instruction in selected phonics concepts, or if further assessment is needed. It may also be used to track progress from earlier skills to grade level mastery.

WHY?

A student's ability to use knowledge of sound/letter correspondences (phonics) to decode words determines, in large measure, his or her ability to read individual words. A detailed assessment of a student's phonics skills points to areas in which the student is likely to benefit most from systematic, explicit phonics instruction. Also, knowing the skills that the student does possess will help in selecting reading tasks that offer the most effective reinforcement of those skills.

HOW?

Instructions for administering each part of the survey are included on the Teacher Record Form. Students read from the Student Pages. When using this survey as a specific skills test or screening measure, do not discontinue testing if a student does not do well on one of the sections. Instead, move to the next section and continue testing. If the student was able to read most of the single syllable real and pseudowords, also administer the multisyllabic section.

To focus the student's attention on the part of the survey being given, cover the other parts of the page with a piece(s) of blank paper. The Teacher Record Form shows the same material that appears on the Student Pages, in a reduced size, so that you may easily record the student's responses. Be aware of the student's behaviour during the survey. If a student is tiring or making many consecutive errors, discontinue testing at that time.

Following administration, score each part of the survey, and transfer the results to the first page on the Teacher Record Form under Skills Summary.
