Language Learning Advanced:

Advanced Language Learning Heidi Byrnes, 2008-12-08 The editor and authors in this volume make a convincing case for focusing on advanced foreign language instruction. Importantly, they invite consideration of this focus as an opportunity to re-examine conventional definitions of the target of instruction. In so doing, readers also learn more about the theories highlighted in this volume and their capacity to enhance our understanding of advancedness and its development within an educational context. This book thus mediates between linguistic and language learning theories and educational practice, modelling the very best of what applied linguistics has to offer. Diane Larsen Freeman, Professor of Education, University of Michigan. The reality of multicultural societies and globalization has increased the demand for language abilities that far exceed those that have typically been associated with communicative competence in a second language. This book examines the acquisition of advanced levels of ability in three parts: theoretical, descriptive, and instructional. It moves beyond the traditional constraints of second language acquisition research by linking systemic functional linguistics and sociocultural theory. The contributors draw primarily on the work of Halliday, Vygotsky, and Bakhtin, as well as empirical data from the language classroom, to suggest practical applications towards advanced literacy and linguistic competence. *Advanced Language Learning* will be of interest to academics researching systemic functional linguistics, second language acquisition, and applied linguistics.

Advanced Language Learning Heidi Byrnes, 2009-02-08 Examines the need for advanced levels of language learning from socio-cultural and linguistic perspectives. *Effective Language Learning* Suzanne Graham, 1997 This book investigates some of the learning processes of students of French and German as they begin language learning at an advanced level, a stage which is frequently problematic. By looking at the learning strategies employed by both successful and less successful language students, the author elucidates some of the key cognitive and affective processes which facilitate advanced level language learning. The implications of this for the classroom are discussed in detail, leading to practical recommendations for learning and teaching strategies. A central theme is the need to teach explicitly the proficient use of learning strategies and suggestions are made as to how this may be achieved in the language classroom.

Teaching Modern Foreign Languages at Advanced Level Norbert Pachler, 1999 The skills and process of teaching modern foreign languages in schools and colleges are the specific focus of this volume. It covers the changing nature of A and AS level courses, planning, teaching, and assessment.

Advanced Foreign Language Learning Heidi Byrnes, Hiram H. Maxim, 2004 The popular AAUSC series of annual volumes for directors of university language programs strives to further scholarship in second language acquisition and teaching with regard to undergraduate programs with multi-section courses. Teaching assistant supervision, teaching assistant professional preparation, and the role of faculty and administrators in postsecondary institutions are some of the topics addressed.

Advanced Proficiency and Exceptional Ability in Second Languages Kenneth Hyltenstam,2016-07-25 While the literature on second language acquisition and use is overwhelmingly rich with respect to initial and intermediate stages of development present knowledge of levels of ultimate attainment that are equal or close to that of native speakers has so far not been presented in a coherent manner This is what the present volume aims to achieve In addition to chapters that summarize what is currently known about the grammatical lexical and discourse features that continue to exhibit instability at the most advanced levels of second language development the volume presents overviews of the incipient research on two unique learner populations polyglots and employees in international call centres Polyglots defined as language users who are proficient in six or more second languages may be considered second language learners par excellence Call centre employees in economically less developed parts of the world are intriguing in how they cope with the high language proficiency requirements of their job In conclusion this book is relevant for all readers both professionals and students interested in the development of second language theory For language teachers the book provides insights that are profitable in classrooms for advanced learners

To Advanced Proficiency and Beyond Newel Anthony Brown,Jennifer Bown,2015-01-02 Due to the pressures of globalization American society increasingly needs citizens who can carry out Superior level functions in languages other than English Instructors researchers and students of second language acquisition seek scholarly resources to help satisfy this demand In this volume leading experts in second language acquisition and language planning supply cutting edge research on working memory and cognition and empirical studies of effective teaching The theoretical and empirical work in these pages is complemented by descriptions of successful pedagogical practices that take students from the Advanced to the Superior levels and beyond With examples ranging across a number of languages including Russian Chinese and Arabic the volume will serve a broad audience This practical handbook will help seasoned instructors improve outcomes while it can also be used for training new instructors in methods courses

Advanced Language Learners Christopher A. Cajski, 1999 Language learning strategies LLS here defined as specific actions or mental procedures that assist in fulfilling language learning goals have attracted increasing attention as one of the factors that impact second language acquisition A key reason for their appeal is that language learning strategies can be manipulated to an extent that most other language acquisition factors cannot Moreover these strategies appear to be a relatively powerful factor in learning another language Nearly all of the language learning strategy research to date has been conducted with the intention of helping less successful language learners However advanced language learners stand to benefit greatly from language learning strategy research as well The purpose of this thesis is to examine the research done on language learning strategies and language learning strategy instruction especially as it pertains to advanced adult learners of a second or foreign language This paper provides a comprehensive review of LLS studies and research findings and concludes with an alternative paradigm of and approach to language learning strategy instruction for advanced language learners The appendix which includes tables such as a list of factors that affect second language acquisition and LLS selection and use may also have special appeal to researchers in this area Contains 7 tables

Educating for Advanced Foreign Language Capacities Heidi Byrnes, Heather D. Weger, Katherine A. Sprang, 2006-10-06 Advanced language learning has only recently begun to capture the interest and attention of applied linguists and professionals in language education in the United States In this breakthrough volume experts in the field lay the groundwork for approaching the increasingly important role of advanced language learning in the larger context of multilingual societies globalization and security This volume presents both general and theoretical insights and language specific considerations in college classrooms spanning a range of languages from the commonly taught languages of English French and German to the less commonly taught Farsi Korean Norwegian and Russian Among theoretical frameworks likely to be conducive to imagining and fostering instructed advancedness in a second language this volume highlights a cognitive semantic approach The theoretical and data based findings make clear that advanced learners in particular are characterized by the capacity to make situated choices from across the entire language system from vocabulary and grammar to discourse features which suggests the need for a text oriented meaning driven approach to language teaching learning and research This volume also considers whether and how information structuring in second language composition reveals first language preferences of grammaticized concepts Other topics include curricular and instructional approaches to narrativity vocabulary expansion the demands on instructed programs for efficiency and effectiveness in order to assure advanced levels and learners ability to function in professional contexts with their diverse oral and written genre requirements Finally the volume probes the role and nature of assessment as a measurement tool for both researching and assessing advanced language learning and as an essential component of improving programs
