Evaluation Theory, Models, and Applications Daniel L. Stufflebeam, Chris L. S. Coryn, 2014-09-26  
The golden standard evaluation reference text  
Now in its second edition *Evaluation Theory Models and Applications* is the vital text on evaluation models perfect for classroom use as a textbook and as a professional evaluation reference  
The book begins with an overview of the evaluation field and program evaluation standards and proceeds to cover the most widely used evaluation approaches  
With new evaluation designs and the inclusion of the latest literature from the field this Second Edition is an essential update for professionals and students who want to stay current  
Understanding and choosing evaluation approaches is critical to many professions and *Evaluation Theory Models and Applications Second Edition* is the benchmark evaluation guide  
Authors Daniel L. Stufflebeam and Chris L. S. Coryn widely considered experts in the evaluation field introduce and describe 23 program evaluation approaches including new to this edition transformative evaluation participatory evaluation consumer feedback and meta analysis  
*Evaluation Theory Models and Applications Second Edition* facilitates the process of planning conducting and assessing program evaluations  
The highlighted evaluation approaches include Experimental and quasi experimental design evaluations  
Daniel L. Stufflebeam's CIPP Model  
Michael Scriven's Consumer Oriented Evaluation  
Michael Patton's Utilization Focused Evaluation  
Robert Stake's Responsive Stakeholder Centered Evaluation  
Case Study Evaluation  
Key readings listed at the end of each chapter direct readers to the most important references for each topic  
Learning objectives review questions student exercises and instructor support materials complete the collection of tools  
Choosing from evaluation approaches can be an overwhelming process but *Evaluation Theory Models and Applications Second Edition* updates the core evaluation concepts with the latest research making this complex field accessible in just one book  
*Credibility, Validity, and Assumptions in Program Evaluation Methodology* Apollo M. Nkwake, 2023  
This book focuses on methods of choice in program evaluation  
Credible methods choice lies in the assumptions we make about the appropriateness and validity of selected methods and the validity of those assumptions  
As evaluators make methodological decisions in various stages of the evaluation process a number of validity questions arise  
Yet unexamined assumptions are a risk to useful evaluation  
The first edition of this book discussed the formulation of credible methodological arguments and methods of examining validity assumptions  
However previous publications suggest advantages and disadvantages of using various methods and when to use them  
Instead this book analyzes assumptions underlying actual methodological choices in evaluation studies and how these influence evaluation quality  
This analysis is the basis of suggested tools  
The second edition extends the review of methodological assumptions to the evaluation of humanitarian assistance  
While evaluators

of humanitarian action apply conventional research methods and standards they have to adapt these methods to the challenges and constraints of crisis contexts For example the urgency and chaos of humanitarian emergencies makes it hard to obtain program documentation objectives may be unclear and early plans may quickly become outdated as the context changes or is clarified The lack of up to date baseline data is not uncommon Neither is staff turnover Differences in perspective may intensify and undermine trust The deviation from ideal circumstances challenges evaluation and calls for methodological innovation And how do evaluators work with assumptions in non ideal settings What tools are most relevant and effective This revised edition reviews major evaluations of humanitarian action and discusses strategies for working with evaluation assumptions in crises and stable program settings
