## **Event Knowledge Structure And Function In Development:**

**Event Knowledge:structure & Function in Development** k (ed.) nelson,1986      **Developmental Spans in Event Comprehension and Representation** Paul van den Broek,Patricia J. Bauer,Tammy Bourg,2013-12-16 This book is about building metaphorical bridges all sorts of bridges At the most basic level it concerns the bridges that individuals build to understand the events that they experience the bridges that connect the events in the mind s eye At another level it is about bridges that interconnect findings and theoretical frameworks concerning event comprehension and representation in different age groups ranging from infancy to adulthood Finally it is about building bridges between researchers who share interests yet may not ordinarily even be aware of each other s work The success of the book will be measured in terms of the extent to which the contributors have been able to create a picture of the course of development across a wide span in chronological age and across different types of events from the fictional to the actual The individuals whose work is represented in this book conduct their work in a shared environment they all have an intellectual and scholarly interest in event comprehension and representation These interests are manifest in the overlapping themes of their work These include a focus on how people come to temporally integrate individual snapshots to form a coherent event that unfolds over time to understand cause and effect and to appreciate the role of the goal of events Another overlapping theme involves the possibility of individual differences These themes are apparent in work on the early development of representations of specific episodes and autobiographical memories and comprehension of complex events such as stories involving multiple characters and emotions The editors of this volume had two missions to create a development span by bringing together researchers working from infancy to adulthood and to create a bridge between individuals working from within the text comprehension perspective within the naturalistic perspective and with laboratory analogues to the naturalistic perspective Their measure of success will be the extent to which they have been able to create a picture of the course of development across a wide span in chronological age and across different types of events from fictional to actual      Context and Development Robert Cohen,Alexander W. Siegel,2014-02-04 The purpose of this book is to explore meaningful integrations of developmental processes and functioning with conceptualizations of context a term traditionally denoting physical settings social arenas or perceptual or social backdrops in relation to a focal point However the study of context has taken a considerably more unique and vibrant form in recent years the term is becoming more than a substitute for background independent variables Rather the contributions of context to behavior thought feelings and vice versa are becoming central issues in many research domains This text is a collection of empirical and theoretical accounts for understanding context its focus is on integrating the study of context with the science of developmental psychology Although the authors work in many different areas of the field and with different populations they all converge on a central methodological conceptual theme of contextualism which is presented as the dynamic integration of intraindividual factors with environmental and social

environmental factors

**The Developmental Psychology of Planning** Sarah L. Friedman,Ellin Kofsky

Scholnick,2014-02-25 Planning is defined as formulating an organized method for action in advance Although people do not plan all the time and planning does not occur in every situation planning skill is central to all human behavior There are developmental differences in planning skill and in the motivation to plan Even among adults variations in the engagement in the planning process are affected by individual attitudes beliefs and goals Planning also has a different meaning at various junctures in one s life Yet despite the amount of research on planning many of the studies have focused only on the cognitive processes that enable mature individuals to plan A continued exploration of the developmental course of planning this text attempts to situate cognitive aspects of planning in the context of the social and cultural environment and other psychological processes Bringing together the contributions of developmental organizational and social psychologists it explains how when and why we plan Finally it addresses various issues that pertain to the different aspects of planning from formal problem solving to handling the demands of everyday life
