Integration of Constraint Programming, Artificial Intelligence, and Operations Research Willem-Jan van Hoeve, 2018-06-07 This book constitutes the proceedings of the 15th International Conference on Integration of Artificial Intelligence and Operations Research Techniques in Constraint Programming for Combinatorial Optimization Problems CPAIOR 2018 held in Delft The Netherlands in June 2018 The 47 full papers presented together with 3 abstracts of invited talks and 3 abstracts of fast track journal papers were carefully reviewed and selected from 111 submissions The conference brings together interested researchers from constraint programming artificial intelligence and operations research to present new techniques or applications in the intersection of these fields and provides an opportunity for researchers in one area to learn about techniques in the others and to show how the integration of techniques from different fields can lead to interesting results on large and complex problems

Uncertainty in Biology Liesbet Geris, David Gomez-Cabrero, 2015-10-26 Computational modeling allows to reduce refine and replace animal experimentation as well as to translate findings obtained in these experiments to the human background However these biomedical problems are inherently complex with a myriad of influencing factors which strongly complicates the model building and validation process This book wants to address four main issues related to the building and validation of computational models of biomedical processes 1 Modeling establishment under uncertainty 2 Model selection and parameter fitting 3 Sensitivity analysis and model adaptation 4 Model predictions under uncertainty In each of the abovementioned areas the book discusses a number of key techniques by means of a general theoretical description followed by one or more practical examples This book is intended for graduate students and researchers active in the field of computational modeling of biomedical processes who seek to acquaint themselves with the different ways in which to study the parameter space of their model as well as its overall behavior

Integration of AI and OR Techniques in Constraint Programming for Combinatorial Optimization Problems Laurent Perron, Michael A. Trick, 2008-05-20 The 5th International Conference on Integration of AI and OR Techniques in Constraint Programming for Combinatorial Optimization Problems CPAIOR 2008 was held in Paris France May 20 23 2008 The purpose of this conference series is to bring together researchers in the elds of constraint programming arti cial intelligence and operations research to explore ways of solving large scale practical optimization problems through integration and hybridization of the elds di erent techniques Through the years this research community is discovering that the elds have much in c mon and there has been tremendous richness in the resulting cross fertilization of elds This year we allowed submissions of both long 15 page and short 5 page papers with short papers either being original work a reduced version of a long paper or an extended abstract of work published elsewhere We were not s prised by the 69 submissions in the long paper category this is an active eld with many researchers We were surprised by the 61 short paper submissions This was far more than predicted With 130 high quality submissions compe tion for acceptance in this year s program was particularly erce In the end we accepted 18 long papers and 22 short papers for presentation and publication in this volume

A Collection of Technical Papers , 2001 **Soft Computing Approach for Mathematical Modeling of Engineering Problems** Ali Ahmadian, Soheil Salahshour, 2021-09-02 This book describes different mathematical modeling and soft computing techniques used to solve

practical engineering problems It gives an overview of the current state of soft computing techniques and describes the advantages and disadvantages of soft computing compared to traditional hard computing techniques Through examples and case studies the editors demonstrate and describe how problems with inherent uncertainty can be addressed and eventually solved through the aid of numerical models and methods The chapters address several applications and examples in bioengineering science drug delivery solving inventory issues Industry 4 0 augmented reality and weather forecasting Other examples include solving fuzzy shortest path problems by introducing a new distance and ranking functions Because in practice problems arise with uncertain data and most of them cannot be solved exactly and easily the main objective is to develop models that deliver solutions with the aid of numerical methods This is the reason behind investigating soft numerical computing in dynamic systems Having this in mind the authors and editors have considered error of approximation and have discussed several common types of errors and their propagations Moreover they have explained the numerical methods along with convergence and consistence properties and characteristics as the main objectives behind this book involve considering discussing and proving related theorems within the setting of soft computing This book examines dynamic models and how time is fundamental to the structure of the model and data as well as the understanding of how a process unfolds Discusses mathematical modeling with soft computing and the implementations of uncertain mathematical models Examines how uncertain dynamic systems models include uncertain state uncertain state space and uncertain state s transition functions Assists readers to become familiar with many soft numerical methods to simulate the solution function s behavior This book is intended for system specialists who are interested in dynamic systems that operate at different time scales The book can be used by engineering students researchers and professionals in control and finite element fields as well as all engineering applied mathematics economics and computer science interested in dynamic and uncertain systems Ali Ahmadian is a Senior Lecturer at the Institute of IR 4 0 The National University of Malaysia Soheil Salahshour is an associate professor at Bahcesehir University
