The Psychological Development of Girls and Women Sheila Greene, 2014-11-27 Choice Recommended Read This thoroughly revised new edition updates Sheila Greene's original transformative account of the psychological development of girls and women and the central role of time in shaping human experience Greene critically reviews traditional and contemporary theoretical approaches ranging from orthodox psychoanalysis to relational and post modern theories and argues that even those that claim to focus on development have presented a view of women's lives as fixed and determined by their nature or their past These theories she believes should be rejected because of their inherent lack of validity and their frequently oppressive implications for women Essential but often neglected insights from the more compelling developmental and feminist theories are woven together within a theoretical framework that emphasizes temporality emergence and human agency The result is a liberating theory of women's psychological development as constantly emerging and changing in time rather than as static and fixed by their nature socio cultural context and personal history Updated for a new generation of readers The Psychological Development of Girls and Women will continue to be essential reading for students and researchers in the psychology of women developmental psychology and women's studies **Exploring Lifespan**

African Traditional And Oral Literature As Pedagogical Tools In Content Area Classrooms Lewis Asimeng-Boahene, Michael Baffoe, 2013-12-01 For a long time many American educators and educational stakeholders have drawn their ideas for educational reforms from ideas generated in Europe and Asia for the changing demographics of America's diverse classrooms This book is therefore motivated by a bold attempt at advocating for the revision of existing pedagogic fora and the creation and addition of new fora that would provide for the inclusion of thoughts perspectives and practices of African traditional oral literature in the pedagogical tools of content area classrooms especially in North America The articles that are presented in this book provide theoretical frameworks for using African traditional oral literature and its various tenets as teaching tools They bring together new voices of how African literature could be used as helpful tool in classrooms Rationale for agitating for its use as ideal for pedagogic tool is the recurrent theme throughout the various articles presented The book explores how educators literacy educators learners

activists policy makers and curriculum developers can utilize the powerful yet untapped gem of African oral literature as pedagogical tools in content area classrooms to help expand educators repertoire of understanding beyond the conventional wisdom of their pedagogic creed It is a comprehensive work of experienced and diverse scholars academicians and educators who have expertise in multicultural education traditional oral literature urban education children s literature and culturally responsive pedagogy that have become the focus of U S discourses in public education and teacher preparation This anthology serves as part of the quest for multiple views about our global village emphasizing the importance of linking the idea of diverse knowledge with realities of global trends and development Consequently the goal and the basic thrust of this anthology is to negotiate for space for non mainstream epistemology to share the pedagogical floor with the mainstream template to foster alternative vision of reality for other knowledge production in the academic domain The uniqueness of this collection is the idea of bringing the content and the pedagogy of most of the genres of African oral arts under one umbrella and thereby offering a practical acquaintance and appreciation with different African cultures It therefore introduces the world of African mind and thoughts to the readers In summary this anthology presents an academic area which is now gaining its long overdue recognition in the academia
