Exploring The Crack In The Cosmic Egg Split Minds And Meta Realities:

Exploring the Crack in the Cosmic Egg Joseph Chilton Pearce, 2014-02-15 The classic follow up to the bestselling *The Crack in the Cosmic Egg* Explains the process of acculturation and the mechanisms that create our self limiting cosmic egg of consensus reality Reveals how our biological development innately creates a crack in our cosmic egg leaving a way to return to the unencumbered consciousness of childhood Explores ways to discover and explore the crack to restore wholeness to our minds and reestablish our ability to create our own realities In this classic follow up to his bestselling *The Crack in the Cosmic Egg* Joseph Chilton Pearce explains the process of acculturation and the mechanisms that create our self limiting cosmic egg of consensus reality Laying the groundwork for his later classic *Magical Child* Pearce shows that we go through early childhood connecting with the world through our senses With the development of language and the process of acculturation not only do our direct experiences of the world become much less vivid but our innate states of nonordinary consciousness become suppressed Trapped in a specific cultural context a cosmic egg we are no longer able to have or even recognize mystical experiences not mediated by the limitations of our culture Motivated primarily by a fear of death our enculturation literally splits our minds and prevents us from living fully in the present Drawing from Carlos Castaneda's writings about Don Juan and the sense of body knowing Pearce explores the varieties of nonordinary consciousness that can help us return to the unencumbered consciousness of our infancy He shows that just as we each create our own cosmic egg of reality through cultural conditioning we also innately create a crack in that egg Ultimately certain shifts in our biological development take place to offset acculturation leaving an avenue of return to our primary state Pearce examines the creation of the egg itself and ways to discover its inherent cracks to restore wholeness to our minds release us from our fear of death and reestablish our ability to create our own realities through imagination and biological transcendence **The Mind's**

Science, Strategy and War Frans P.B. Osinga, 2007-01-24 John Boyd is often known exclusively for the so called OODA loop model he developed This model refers to a decision making process and to the idea that military victory goes to the side that can complete the cycle from observation to action the fastest This book aims to redress this state of affairs and reexamines John Boyd's original contribution to strategic theory By highlighting diverse sources that shaped Boyd's thinking and by offering a comprehensive overview of Boyd's work this volume demonstrates that the common interpretation of the meaning of Boyd's OODA loop concept is incomplete It also shows that Boyd's work is much more comprehensive richer and

deeper than is generally thought With his ideas featuring in the literature on Network Centric Warfare a key element of the US and NATO s so called military transformation programmes as well as in the debate on Fourth Generation Warfare Boyd continues to exert a strong influence on Western military thinking Dr Osinga demonstrates how Boyd s work can help us to understand the new strategic threats in the post 9 11 world and establishes why John Boyd should be regarded as one of the most important post modern strategic theorists

Ordaining Reality Joseph E. Donlan, 2021-06-06 Many people believe in the power of positive thinking i e how thoughts and attitude can shape their future yet despite a plethora of books on this subject no previous author has credibly explained how mere thoughts are able to tangibly influence future events To explain the connection Dr Donlan presents a new paradigm of nature coupled with a viable explanation of how our right cerebral hemisphere has evolved circuitry that can tap into the hidden domain of the metaphysical To support this premise he exposes the reader to the worlds of physics metaphysics brain architecture and evolution Donlan then introduces the many problems associated with the current model and contrasts it with a new view which remedies many of the issues facing theoretical physicists today Important to its central theme the book s proposed paradigm supports the remarkable notion that the future can only be created with thoughts In the final analysis the author brings his readers through the necessary steps to put this knowledge to work to help them pre ordain their own realities

Ordaining Reality Made Easy Joseph E. Donlan, 2009 Many people believe in the Power of Positive Thinking but no one has succeeded in credibly explaining how mere thoughts can tangibly influence future occurrences To explain the connection this book presents a new paradigm of nature and couples it with a convincing explanation of how our right brain hemispheres have a unique ability to tap into the hidden domain of the metaphysical To support this premise the reader is lightly exposed to the divergent worlds of physics and metaphysics and is then introduced to a new view of nature that undeniably links mind to matter Important to its charge the new perspective makes the case that the future can only be created with thoughts In the final analysis the author brings his readers through the necessary steps to put this knowledge to work to help them create their own realities

Donlan, 2009

Many people believe in the Power of Positive Thinking but no one had succeeded in credibly explaining how mere thoughts can tangibly influence future occurrences To explain the connection Joseph Donlan presented highly plausible theories in two preceding books Each of these books presents a new paradigm of nature and couples it with a convincing explanation of how our right brain hemispheres have a unique ability to tap into the hidden domain of the metaphysical This final book in the series also supports these premises however it does so at a higher more condensed level so that readers with no background in science can gain enough information to appreciate the divergent worlds of physics and metaphysics and gain a view of nature that undeniably links mind to matter **Catalog of Copyright Entries.
