Exploring the Nature of Creativity Jon Michael Fox, Ronni Lea Fox, 2019-07-26      How to Do Ecology Richard Karban, Mikaela Huntzinger, Ian S. Pearse, 2023-08

The essential insider's guide for ecologists at all career stages now completely updated and expanded. Most books and courses in ecology focus on facts and concepts but do little to explain the process of research. *How to Do Ecology* provides nuts and bolts advice for organizing and conducting a successful research program. This fully updated and expanded edition explains how to ask and answer your own research questions using compelling study design and appropriate stats. Ecology doesn't take place exclusively outdoors so the book shares invaluable insights on topics such as identifying your goals, developing professional relationships, reading efficiently, and organizing a field season. Because the currency in ecology is publications, it also suggests effective ways to communicate your ideas through journal articles, oral presentations, posters, and grant proposals. This incisive handbook makes explicit many of the unstated rules that ecologists follow and serves as a practical resource for meaningful conversations about ecology. This new edition includes:

- Expanded emphasis on collecting and interpreting observational data.
- An innovative new workshop for generating and evaluating creative research questions.
- Helpful tips on developing the skills most important to students navigating your career path, writing efficiently, and more.

Art, Ethics and Environment Ólafur Páll Jónsson, Æsa Sigurjónsdóttir, 2009-03-26

Nature has been a recurrent theme in arts and philosophy for several decades. Nature is experienced in a variety of contexts: artists have been enacting with nature as phenomena, material space, environment, or simply as a place or an idea. In philosophy, this is evidenced by an increasing interest in environmental ethics and aesthetics, as well as in philosophy of biology and metaphysics. In the 1960s, new affinities between art and nature developed and became among the characteristics of contemporary art. Environmental approaches became essential, and artists were engaging the public closely with social and physical spaces. Generating processes rather than creating objects, both in nature as well as in the urban landscape, artists reintroduced art into nature and nature into art and opened up new ways of engaging environment, creating non-permanent artworks which produced a new understanding of creativity that following generations are still exploring. The distinction between art and nature became increasingly blurred at the same time as the ancient dichotomy of culture and nature became controversial. With the rise of environmental ethics in the 1970s, philosophers began discussing nature as an independent source of moral values rather than a mere stage for moral life, deriving its value from relations among humans. It has both been suggested that nature might have independent moral value, much like persons are thought to have such value, or that nature can be an active participant in a morally virtuous life. Both aesthetics of nature and environmental ethics have become established fields in contemporary philosophy with their distinct bibliographies to draw on. But even if distinct and properly so, these two new fields might be more closely related than often suggested. The aim of this collection is to bring together different trends in thinking about nature and value that are

distinctive of these changing moods in art and philosophy and to juxtapose them with some other ways of thinking about these issues such as economics and religion The authors include Holmes Rolston III Antje von Graevenitz Roger Pouivet Eric Palazzo and Emily Brady The essays and artworks in this volume derive from the conference Nature in the Kingdom of Ends held in Selfoss Iceland on June 11th and 12th 2005 *Educational Research and Innovation The Nature of Problem Solving Using Research to Inspire 21st Century Learning* OECD,2017-04-11 Solving non routine problems is a key competence in a world full of changes uncertainty and surprise where we strive to achieve so many ambitious goals But the world is also full of solutions because of the extraordinary competences of humans who search for and find them *The Routledge Handbook of Events* Stephen J.
