Exploring Twentieth Century Music Tradition And Innovation:

Exploring Twentieth-Century Music Arnold Whittall, 2003-02-27 In this wide ranging book Arnold Whittall considers a group of important composers of the twentieth century including Debussy Webern Schoenberg Stravinsky Bartók Janáček Britten Carter Birtwistle Andriessen and Adams He moves skilfully between the cultural and the technical the general and the particular to explore the various contexts and critical perspectives which illuminate certain works by these composers Considering the extent to which place and nationality contribute to the definition of musical character he investigates the relevance of such images as mirroring and symmetry the function of genre and the way types of identity may be suggested by such labels as classical modernist secular sacred radical traditional These categories are considered as flexible and interactive and they generate a wide ranging series of narratives delineating some of the most fundamental forces which affected composers and their works within the complex and challenging world of the twentieth century Musical Modernism in Global Perspective Björn Heile, 2024-05-30 The first study of the global dimensions of musical modernism and its transnational diasporic network of composers musicians and institutions **Towards a Twenty-First-Century Feminist Politics of Music** Sally Macarthur, 2016-02-24 Towards a Twenty First Century Feminist Politics of Music opens up a new way of thinking about the absence of women's music It does not aim to find a solution in a liberal feminist sense but to discover new potentialities new possibilities for thought and action Sally Macarthur encourages us with the assistance of Deleuze and feminist Deleuzian work to begin the important work of imagining what else might be possible not in order to provide answers but to open up the as yet unknown The power of thought or what Deleuze calls the virtual opens up new possibilities Macarthur suggests that the future for women's new music is not tied to the predictable and known but to futures beyond the already known Previous research concludes that women's music is virtually absent from the concert hall and yet fails to find a way of changing this situation Macarthur finds that the flaw in the recommendations flowing from past research is that it envisages the future from the standpoint of the present and it relies on a set of pre determined goals It thus replicates the present reality so reinforcing rather than changing the status quo Macarthur challenges this thinking and argues that this repetitive way of thinking is stuck in the present unable to move forward Macarthur situates her argument in the context of current dominant neoliberal thought and practice She argues that women have generally not thrived in the neoliberal model of the composer which envisages the composer as an individual autonomous creator and entrepreneur Successful female composers must work with this dominant modernist aesthetic and exploit the image of the neo romantic entrepreneurial creator This book sets out in contrast to develop a new conception of subjectivity that sows the seeds of a twenty first century feminist politics of music Music Semiotics: A Network of Significations Esti Sheinberg, 2017-07-05 United in their indebtedness to the scholarship of Raymond Monelle an international group of contributors including leading authorities on music and culture come together in this state of the art volume to investigate different ways in which music

signifies Music semiotics asks what music signifies as well as how the signification process takes place Looking at the nature of musical texts and music's narrativity a number of the essays in this collection delve into the relationship between music and philosophy literature poetry folk traditions and the theatre with opera a genre that particularly lends itself to this mode of investigation Other contributions look at theories of musical markedness metaphor and irony using examples and specific musical texts to serve as case studies to validate their theoretical approaches Musical works discussed include those by Haydn Mozart Beethoven Schumann Wagner Stravinsky Bart Xenakis Kutavicius and John Adams offering stimulating discussions of music that attest to its beauty as much as to its intellectual challenge Taking Monelle's writing as a model the contributions adhere to a method of logical argumentation presented in a civilized and respectful way even and particularly when controversial issues are at stake keeping in mind that contemplating the significance of music is a way to contemplate life itself

Human-Computer Interaction Masaaki Kurosu, Ayako Hashizume, 2025-06-03 This seven volume set constitutes the refereed proceedings of the Human Computer Interaction thematic area of the 27th International Conference on Human Computer Interaction HCII 2025 held in Gothenburg Sweden during June 22-27 2025 The HCI Thematic Area constitutes a forum for scientific research and addressing challenging and innovative topics in Human Computer Interaction theory methodology and practice including for example novel theoretical approaches to interaction novel user interface concepts and technologies novel interaction devices UI development methods environments and tools multimodal user interfaces emotions in HCI aesthetic issues HCI and children evaluation methods and tools and many others
