

Exploring London – London Eye

The London Eye is a famous landmark located in the heart of London, England. It is the UK's number one paid tourist attraction. It is a giant Ferris wheel situated on the South Bank of the River Thames. The London Eye offers stunning views of the city's skyline, including iconic landmarks such as the Houses of Parliament, Big Ben, and Buckingham Palace.

Visitors to the London Eye can enjoy a scenic ride in one of the glass capsules attached to the wheel. Each capsule provides a 360-degree view of London, allowing passengers to see the city from a unique perspective. The

ride takes about 30 minutes to complete, giving ample time to soak in the breathtaking sights. The London Eye was originally built to celebrate the turn of the millennium and has since become one of the most popular tourist attractions in the United Kingdom. In addition to its regular daytime operation, the London Eye also offers special experiences such as sunset rides and private capsule hire for events and celebrations.

Exploring London 1996:

Photography and Exploration James R. Ryan, 2013-07-15 When Ferdinand Magellan set out to circumnavigate the globe in 1519 he wasn't able to bring a digital camera or a smartphone with him Yet as the eagerly awaited images from the Mars rover prove modern exploration is inconceivable without photography Since its invention in 1839 photography has been integral to exploration used by explorers sponsors and publishers alike and the early twentieth century advances in technology and photography's newfound cultural currency as a truthful witness to the world made the camera an indispensable tool In *Photography and Exploration* James R Ryan uses a variety of examples from polar journeys to space missions to show how exploration photographs have been created circulated and consumed as objects of both scientific research and art Examining a wide range of photographs and expeditions Ryan considers how nations have often employed images as a means to scientific advancement or territorial conquest He argues that because exploration has long been bound up with the construction of national and imperial identity expeditionary photographs have often been used to promote claims to power especially by the West These images also challenge the way audiences perceive the world and their place within it Featuring one hundred images *Photography and Exploration* shines new light on how photography has shaped the image of explorers expeditions and the worlds they discovered *New Spaces of Exploration* Simon Naylor, James R.

Ryan, 2009-12-18 For many the dawn of the twentieth century ushered in an era where the world map had few if any blank spaces left to discover The age of exploration was supposedly dead *New Spaces of Exploration* challenges this assumption Focusing specifically on exploration in the twentieth century the authors demonstrate how new technologies and changing geopolitical configurations have ensured that exploration has remained a key feature of our rapidly globalizing world Ranging widely in their geographical focus from the Europe and Asia to Australia and from the polar regions to outer space they demonstrate the increasing diversity of modern exploration and reveal the continuing political military industrial and cultural motivations at play The result is a major contribution to our understanding of the significance of exploration in the twentieth century Contributors include E Baigent C Collis K Dodds F Driver M Godwin J Hill F Korsmo F MacDonald S Naylor J Ryan N Thomas and K Yusoff **Proceedings of the International Field Exploration and Development Conference**

Merwe, Glyn Williams, 2018-09-06 Captain Cook is generally acknowledged as the first great European scientific explorer. His voyage of exploration to the Pacific in HM bark Endeavour commencing in 1768 lasted almost three years, recorded thousands of miles of uncharted lands and seas including New Zealand, the east coast of Australia and many Pacific islands, and tested all Cook's skills as a navigator, seaman and leader. His voyages were among the first to take civilian scientists, notably Sir Joseph Banks, and they revealed to European eyes the mysterious and exotic lands, peoples, flora and fauna of the Pacific never before seen. But while Cook understandably dominates the story of 18th century Pacific exploration, the achievements of those who followed him on many voyages of science and exploration into the Pacific have been neglected and deprived of the greater attention they deserve. Correcting this imbalance, *Pacific Exploration* explores the European voyages that continued Cook's work, not only of charting but also starting to exploit and control the Pacific. These voyages by William Bligh, George Vancouver, Matthew Flinders, Malaspina, Lap Rouse and Arthur Phillip span a period that saw Britain becoming the world's leading maritime power, a situation well in place by the time that Charles Darwin's voyage in Fitzroy's Beagle laid the basis of even greater understanding of the development of life on earth. Recounting and illustrating these achievements and legacies using fascinating text and beautiful illustrations and artworks from the period, this book explores topics of scientific discovery, engagement with indigenous peoples, the use of shipboard artists and scientists, the growing professionalism of the hydrographic service, the vessels used and the colonial commercial and imperial contexts of the voyages.

The Arctic in the British imagination 1818-1914 Rob David, 2017-03-01 The Arctic region has been the subject of much popular writing. This book considers nineteenth century representations of the Arctic and draws upon an extensive range of evidence that will allow the widest connections to emerge from a cross disciplinary analysis using different methodologies and subject matter. It positions the Arctic alongside more thoroughly investigated theatres of Victorian enterprise. In the nineteenth century, most images were in the form of paintings, travel narratives, lectures given by the explorers themselves and photographs. The book explores key themes in Arctic images which impacted on subsequent representations through text, painting and photography. For much of the nineteenth century, national and regional geographical societies promoted exploration and rewarded heroic endeavor. The book discusses images of the Arctic which originated in the activities of the geographical societies. The Times provided very low key reporting of Arctic expeditions as evidenced by its coverage of the missions of Sir John Franklin and James Clark Ross. However, the illustrated weekly became one of the main sources of popular representations of the Arctic. The book looks at the exhibitions of Arctic peoples, Arctic exploration and Arctic fauna in Britain. Late nineteenth century exhibitions which featured the Arctic were essentially nostalgic in tone. The Golliwogg's Polar Adventures, published in 1900, drew on adult representations of the Arctic and will have confirmed and reinforced children's perceptions of the region. Text books, board games and novels helped to keep the subject alive among the young.
