Domesticating Dogs Simbio Answers:

The First Domestication Raymond John Pierotti, Brandy R. Fogg, 2017-01-01 Raymond Pierotti and Brandy Fogg change the narrative about how wolves became dogs and in turn humanity's best friend. Rather than recount how people mastered and tamed an aggressive dangerous species, the authors describe coevolution and mutualism. Wolves, particularly ones shunned by their packs, most likely initiated the relationship with Paleolithic humans, forming bonds built on mutually recognized skills and emotional capacity. This interdisciplinary study draws on sources from evolutionary biology as well as tribal and indigenous histories to produce an intelligent, insightful, and often unexpected story of cooperative hunting, wolves protecting camps, and wolf-human companionship. The treatment of our domesticated dogs Maurice Hartland J. Mahon, 1868. *Domesticated Animals* Nathaniel Southgate Shaler, 2020-05-22. Naturalists are much divided in opinion in all that relates to the origin of our ancient and common domesticated animals, and this for the reason that the longer a creature has been subjected to the change bringing conditions of our fields and households, the further it has departed from the parent stock. This difficulty is naturally the greatest in the case of the dogs, for the reason that they have been longer and more completely under the control of man than any other of the lower animals. Some students of the problem have inclined to the opinion that the dog is a descendant of the wolf; the whelps of this species it is supposed were captured by primitive men and brought under domestication. Savages like children are much given to bringing the young of wild animals to their homes; if the conditions are favorable they will care for these captives even if the charge upon their resources is tolerably heavy. With most primitive people, however, life is so vagarious and starvation so recurrent that they are not apt to retain their pets long enough to establish domesticated forms. Thus among our American Indians, though they show fondness for wild creatures as much as any other people, no species save the dog ever became permanently associated with their tribe. It is however possible that in some sedentary group of savages the work of domesticating the ancestors of the dog, even if they were wolf-like, was accomplished.
