

DORNIER A1 air-jet weaving machine for tire cord ...

Increasing volume requirements and also higher claims on safety and performance for vehicle tires have necessitated the development of a modern, high-speed and high-precision tire cord weaving machine. The special characteristics of cord fabrics for motor car tires, but also for bicycle tires and other applications, mean that they claim a special status among industrial fabrics. The DORNIER A1 air-jet weaving machine meets the requirements in thoroughly convincing manner.

A1 air-jet weaving machine for tire cord

Main drive

The DORNIER tire cord air-jet weaving machine is set up on direct drive and delivered from the beginning with the programmable soft start, so that the machine starts at a pre-programmed low speed and accelerates over 2 to 10 seconds to the final machine speed. This reduces tension on picks in the creel, especially with the heavy spools.

Softstart programmable to the requirement

DORNIER ErgoDrive[®] with touchscreen

The software is operated via a spacious, user-friendly designed 15 inch touchscreen panel. Graphic representations of function cycles plus universally comprehensible symbols facilitate understanding of the selection possibilities. Direct access to important settings and to the electronically stored operating manual significantly reduces analysis time.

Graphic designed user interface
