The Rhetoric of Topics and Forms Gianna Zocco, 2021-01-18 The fourth volume of the collected papers of the ICLA congress The Many Languages of Comparative Literature includes articles that study thematic and formal elements of literary texts Although the question of prioritizing either the level of content or that of form has often provoked controversies most contributions here treat them as internally connected While theoretical considerations inform many of the readings the main interest of most articles can be described as rhetorical in the widest sense given that the ancient discipline of rhetoric did not only include the study of rhetorical figures and tropes such as metaphor irony or satire but also that of topoi which were originally viewed as the places where certain arguments could be found but later came to represent the arguments or intellectual themes themselves Another feature shared by most of the articles is the tendency of undeclared thematology which not only reflects the persistence of the charge of positivism but also shows that most scholars prefer to locate themselves within more specific often interdisciplinary fields of literary study In this sense this volume does not only prove

the ongoing relevance of traditional fields such as rhetoric and thematology but provides contributions to currently flourishing research areas among them literary multilingualism literature and emotions and ecocriticism A Handbook of Literary Criticism William Henry Sheran,1905 *A History of English Poetry: The Holy Roman Empire, the Renaissance, the French Revolution* William John Courthope,1910 **Romantic Revisions** Robert Brinkley,Keith Hanley,1992-10-22 Leading American and British textual editors respond to the recent radical overhaul in the editing of Romantic texts in the light of developments in critical theory *The Termination of the Sixteenth Canto of Lord Byron's Don Juan* Harry W Wetton,2023-07-18 This critical analysis of the sixteenth canto of Lord Byron's Don Juan provides a scholarly examination of the poem's themes and literary techniques The author Harry W Wetton offers a close reading of the poem and explores its historical and cultural significance This book is an essential resource for students and scholars of English literature and poetry This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **The romantic movement in English poetry, effects of the French revolution** William John Courthope,1910 Print and Performance in the 1820s Angela Esterhammer,2020-02-20 Illuminates Britain's literary field during the 1820s as a decade of improvisation speculation and rapid cultural change
