Penney, 2002 Complete Solutions Manual for Single Variable Calculus, Early Transcendentals, Fifth Edition Daniel Anderson, 2003 *Teaching First* Thomas Rishel, 2000

In *Teaching First* Thomas Rishel draws on his forty years of teaching experience to address the nuts and bolts issues of teaching college mathematics. This book is written for the mathematics TA or young faculty member who may be wondering just where and how to start. Rishel opens the eyes of the reader to pitfalls they may never have considered and offers advice for balancing an obligation to the student with an obligation to mathematics. Throughout he provides answers to seemingly daunting questions shared by most new TAs such as how to keep a classroom active and lively, how to prepare writing assignments, tests and quizzes, how exactly to write a letter of recommendation, and how to pace minute by minute the mathematical talks one will be called upon to give. This book is Rishel's answer to those who may suggest that good teaching is innate and cannot be taught. This he emphatically denies, and he insists that solid teaching starts with often overlooked seeming trivialities that one needs to master before exploring theories of learning. Along the way he also covers the general issues that teachers of all subjects eventually experience: fairness in grading, professionalism among students and colleagues, identifying and understanding student types, technology in the classroom. All of the subjects in this book are considered within the context of Rishel's experience as a mathematics teacher. All are illustrated with anecdotes and suggestions specific to the teaching of mathematics. *Teaching First* is a comprehensive guide for a mathematics TA from the first semester preparations through the unforeseen challenges of accepting a faculty position. Its aim is to prepare the new TA with clear suggestions for rapidly improving their teaching abilities.
