Earthkeeping In The Nineties Stewardship Of Creation:

Earthkeeping in the Nineties Peter De Vos, 1991 Ever since its original publication over a decade ago Earthkeeping has presented a thought provoking biblically based call for responsible stewardship In view of the continuing environmental crisis worldwide and in light of increased ecological awareness in recent years the book s message regarding earthkeeping is now more pertinent than ever Earthkeeping in the Nineties Loren Wilkinson, 2003-10-14 Ever since its original publication over a decade ago Earthkeeping has presented a thought provoking biblically based call for responsible stewardship In view of the continuing environmental crisis worldwide and in light of increased ecological awareness in recent years the book s message regarding earthkeeping is now more pertinent than ever This greatly revised and augmented edition of Earthkeeping updates the original edition while retaining the same breadth of perspective reflecting the combined insights of Christian scholars in biology physics economics literature and philosophy The book begins by laying out with scientific precision the state of the planet Several chapters then carefully examine various historical and contemporary views of creation Next the authors survey biblical and theological teaching relative to humanity s use of creation The book concludes by offering helpful practical guidelines for an earthkeeping ethic Besides providing an updated state of the planet analysis this revised edition of Earthkeeping deals with recent cultural and religious developments incorporating new material for example on the Deep Ecology and new age movements the Gaia hypothesis and ecofeminism This edition also takes into account the recent wealth of Christian thinking about the earth including the recovery of important but neglected voices from the Christian tradition such as Hildegard of Bingen and Celtic spirituality At the end of the book an expanded and updated annotated bibliography organized according to subject area and new indexes of names and subjects and of Scripture references enhance the value of Earthkeeping as a significant resource fostering better human stewardship of God s creation

Ecologies of Grace Willis Jenkins, 2013-02-12 Christianity struggles to show how living on earth matters for living with God While people of faith increasingly seek practical ways to respond to the environmental crisis theology has had difficulty contextualizing the crisis and interpreting the responses In *Ecologies of Grace* Willis Jenkins presents a field shaping introduction to Christian environmental ethics that offers resources for renewing theology Observing how religious environmental practices often draw on concepts of grace Jenkins maps the way Christian environmental strategies draw from traditions of salvation as they engage the problems of environmental ethics He then uses this new map to explore afresh the ecological dimensions of Christian theology Jenkins first shows how Christian ethics uniquely frames environmental issues and then how those approaches both challenge and reinhabit theological traditions He identifies three major strategies for making environmental problems intelligible to Christian moral experience Each one draws on a distinct pattern of grace as it adapts a secular approach to environmental ethics The strategies of ecojustice stewardship and ecological spirituality make environments matter for Christian experience by drawing on patterns of sanctification redemption and deification He then

confronts the problems of each of these strategies through critical reappraisals of Thomas Aquinas Karl Barth and Sergei Bulgakov Each represents a soteriological tradition which Jenkins explores as an ecology of grace letting environmental questions guide investigation into how nature becomes significant for Christian experience By being particularly sensitive to the ways in which environmental problems are made intelligible to Christian moral experience Jenkins guides his readers toward a fuller understanding of Christianity and ecology He not only makes sense of the variety of Christian environmental ethics but by showing how environmental issues come to the heart of Christian experience prepares fertile ground for theological renewal

God and the Crisis of Freedom Richard Bauckham,2002-01-01 This book outlines a biblical understanding of freedom and the particular ways in which Christians choose to exercise that freedom in response to major issues confronting the world today Specifically Bauckham constructs a Christian understanding of freedom explores the authority of Scripture in modern and postmodern contexts and also examines themes of tradition ethics oppression and ecology as they relate to issues of freedom and authority

Caring for Creation Max Oelschlaeger,1996-01-01 Argues that religion blamed for contributing to the ecological crisis provides an ethical context that will help solve the problem The approach suggests that the environmentally positive aspects in various Western creation stories demonstrate religion

From Jerusalem to Gaza B. Donald Keyser,Harold Wayne Ballard,2002 From Jerusalem to Gaza An Old Testament Theology is a theological treatment of significant themes found throughout the pages of the Old Testament Though theological in nature the book is written for academic pursuits as well as lay interests Its simple straightforward approach is combined with Christian sensibilities in regards to the texts of the Old Testament It is designed for use in a number of settings including the academic classroom advanced Bible Study in churches or personal study in the Old Testament scriptures

Environmental Missions Lowell Bliss,2013-10-16 Planting Churches and Trees Environmental Missions defines an emerging category in missions one that takes seriously both the mandate to evangelize the world and the responsibility of caring for God s good earth Lowell Bliss was a traditional church planting missionary in India when his best Hindu friend there died of malaria This was just one of the events that led him to reexamine the politically charged term environment understanding it now as simply that which surrounds those we love those for whom Jesus died In other words the church is called to reach not only vulnerable people but the space in which they live and breathe Pointing to the narrative of Scripture and the history of missions Bliss shows us that the gospel of Jesus Christ is good news for the whole creation that we must unite two traditionally separate endeavors to fulfill the entirety of God s commission and that the challenge of the environmental crises of our day is also one of our greatest opportunities to reach the least reached with the love of Christ

Between God & Green Katharine K. Wilkinson,2012-04-01 Despite three decades of scientists warnings and environmentalists best efforts the political will and public engagement necessary to fuel robust action on global climate change remain in short supply Katharine K Wilkinson shows that contrary to popular expectations faith based efforts are

emerging and strengthening to address this problem In the US perhaps none is more significant than evangelical climate care Drawing on extensive focus group and textual research and interviews Between God Green explores the phenomenon of climate care from its historical roots and theological grounding to its visionary leaders and advocacy initiatives Wilkinson examines the movement's reception within the broader evangelical community from pew to pulpit She shows that by engaging with climate change as a matter of private faith and public life leaders of the movement challenge traditional boundaries of the evangelical agenda partisan politics and established alliances and hostilities These leaders view sea level rise as a moral calamity lobby for legislation written on both sides of the aisle and partner with atheist scientists Wilkinson reveals how evangelical environmentalists are reshaping not only the landscape of American climate action but the contours of their own religious community Though the movement faces complex challenges climate care leaders continue to leverage evangelicalism's size dominance cultural position ethical resources and mechanisms of communication to further their cause to bridge God and green

Environmental Ethics ,2003 *Religion and the Environment* Roger S. Gottlieb,2010 In the last two decades a new form of religiously motivated social action and a virtually new field of academic study each based in recognition of the connections between religion and humanity's treatment of the environment have developed Interactions between religion and environmental concern have been manifest in the explosive growth of ecotheological writings institutional commitment by organized religions and environmental activism explicitly oriented to religious ideals Clergy throughout the world in virtually every denomination have received word from leaders of their religion that the environment no less than sexuality poverty or war and peace is now a basic and compelling religious matter Out of this confrontation have been born vital new theologies based in the recovery of marginalized elements of tradition profound criticisms of the past and ecologically oriented visions of God the Sacred the Earth and human beings Theologians from every religious tradition along with dozens of non denominational spiritual writers have confronted world religions past attitudes towards nature In the realm of institutional commitment public statements and actions by organized religions have grown dramatically In the context of political action throughout the U S and the world religiously oriented groups take part in environmentally oriented political action from lobbying and consciousness raising to activist demonstrations and civil disobedience This collection serves as a comprehensive introduction overview and in depth account of these exciting new developments The four volumes cover virtually every aspect of the field from theological change and institutional commitment to innovation in liturgy from new ecumenical connections among different religions and between religion science and environmental movements from religious participation in environmental politics to an account of the global social and political contexts in which religious environmentalism has unfolded
