How to Prevent Recession Satya Saurabh Khosla, 2015-05-20 This is a very profound concept put in a very simple and beautiful format as written in the Foreword by His Holiness the Dalai Lama In October 2007 author Satya Saurabh Khosla's article predicting the recession was published in Business Times Singapore Millions suffered despite its accurate warning While analysing this later he felt that preventing a recession will help society more How to Prevent Recession seeks to rely on ethics in the strategy used for life and work Values are a Strategy for living life These are applied at work to prevent recession If profit becomes the only purpose of life it disturbs the framework which sustains society How to Prevent Recession uses the ancient framework of four goals of life It applies these goals to business from a strategy of life This book compares profit to the speed of a car If personal and firm's profit is only maximised brakes are forgotten Management Ideas given by Porter state that strategy is an optimisation effort Profit too should result from it A car's speed is optimised when it considers criteria like bad roads to avoid jerks for passengers fuel efficiency and reducing speed to prevent a crash Ancient wisdom trains the human mind Then the Truth about optimum strategy emerges from within as we drive the car of life to work Strategy is a way of achieving a goal So ancient Indian wisdom of four goals of life are like a car's four wheels An optimisation effort balances the pressure The wisdom of using righteous conduct prevents recession The book makes the important point that any business strategy should emerge from a conception of a decent life rooted in spirituality Pradip Khandwalla former Director Indian Institute of Management Ahmedabad Excellent work Brilliant in its integration of ancient Indian Truths with the concept of management Prof P N Sharma Member Governing Body Library of Tibetan Works Archives

Diverse Economies and Food Democracy: Implications for Sustainability from an Interdisciplinary Perspective Andreas Exner, Andreas Mayer, Moya Kneafsey, 2025-09-26 In view of the multifaceted challenge of transforming towards inclusive and sustainable food systems scholars have drawn attention to diverse economies of food such as food coops community supported agriculture urban community gardens or fair trade Diverse economies of food have been labeled in various ways The notion of alternative agro

food networks AFN has gained the broadest appeal in this regard However this notion and similar ones have been criticized on a conceptual level and the assumption that diverse economies of food may substantially contribute to the sustainable transformation of food systems has been questioned on theoretical methodological and political grounds Although food democracy is recurrently mentioned in relation to diverse economies of food a proper operationalization of this concept is largely missing as well as robust quantifications of the sustainability implications of those By focusing on food democracy as forms of joint decision making by food producers consumers public authorities and stakeholders on various scales diverse economies of food can be clarified conceptually and the environmental impacts quantified as well as trade offs and synergies assessed This allows us to investigate more precisely the possible sustainability and transformative impacts of diverse economies of food
