From Great Depression to Great Recession Mr. Atish R. Ghosh, Miss Mahvash S. Qureshi, 2017-03-30 The global financial crisis and the ensuing Great Recession raised concerns about adjustment fatigue deflation currency wars and secular stagnation that presented a sense of déjà vu similar concerns had arisen at the time of the Great Depression and at the end of World War II As with earlier crises these concerns prompted calls for greater international policy cooperation both to achieve a sustainable recovery from the crisis and to prevent future crises This volume compiles papers from a 2015 symposium of eminent scholars convened by the IMF to discuss how history can inform current debates about the functioning and challenges of the international monetary system An introductory chapter sets the stage for the other chapters in the volume by giving a broad overview of the performance of the international monetary system over the past century highlighting the key events and challenges that shaped it Subsequent sections look at historical antecedents of today's challenges describe how the modern international monetary system has

been and continues to be shaped through international financial diplomacy provide a present day perspective and examine the analytics of international policy coordination *Service Bulletin of the FREC* Federal Radio Education Committee,1939
