may affect local government's decisions regarding contractual form innovation Using the author's unique data set the model simulations predict that the development in the whole market system will result in the diffusion of contractual form innovation and lead to an induced privatization in this sector The following empirical studies show this to be a powerful prediction and the progress toward such induced privatization can be expected in China in near future This research work provides a rich empirical study on China's institutional transition towards a market system It explains how a bottom up endogenous instead of top down exogenous property rights reform can be realized in transitional economies This work will serve as a valuable reference for researchers and students in economics economic development and institutional economics and especially for those interested in research America Pathways to the Present ,1995 Economic Review ,1920
