Moving INTO the Classroom Stacia C Miller, Suzanne F Lindt, 2017-09-06 This textbook focuses on research in movement integration and the benefits of physical activity to the child's physical cognitive emotional and social development. It includes research on and suggestions for integrating movement into English language arts mathematics science and social studies for lower and upper elementary students. Though the textbook is specifically aimed at elementary level teachers, secondary teachers and pre-service teachers can modify the activities to fit their lessons as well.

Complex Networks IX Sean Cornelius, Kate Coronges, Bruno Gonçalves, Roberta Sinatra, Alessandro Vespignani, 2018-02-15 This book aims to bring together researchers and practitioners working across domains and research disciplines to measure model and visualize complex networks. It collects the works presented at the 9th International Conference on Complex Networks CompleNet in Boston MA March 2018. With roots in physical information and social science, the study of complex networks provides a formal set of mathematical methods computational tools and theories to describe prescribe and predict dynamics and behaviors of complex systems. Despite their diversity, whether the systems are made up of physical technological informational or social networks, they share many common organizing principles and thus can be studied with similar approaches. This book provides a view of the state of the art in this dynamic field and covers topics such as group decision making brain and cellular connectivity network controllability and resiliency online activism recommendation systems and cyber security.

The School Garden Curriculum Kaci Rae Christopher, 2019-04-23 Sow the seeds of science and wonder and inspire the next generation of Earth stewards. The School Garden Curriculum offers a unique and comprehensive framework enabling students to grow their knowledge throughout the school year and build on it from kindergarten to eighth grade. From seasonal garden activities to inquiry projects and science skill building, children will develop organic gardening solutions, a positive land ethic, systems thinking and instincts for ecological stewardship. The world needs young people to grow into strong scientifically literate environmental stewards. Learning gardens are great places to build this knowledge, yet until now there has been a lack of a multi-grade curriculum for school-wide teaching aimed at fostering a connection with the Earth. The book offers a complete K-8 school-wide framework. Over 200 engaging weekly
