

A photograph of a tropical beach. The foreground is filled with numerous footprints in the wet sand, leading towards the water. The beach is bordered by a dense line of palm trees and other tropical vegetation on the left. The sky is dark and overcast, suggesting an approaching storm or late evening. The overall mood is serene yet dramatic.

Forthcoming Books Rose Arny, 2003-04 **Ecotourism** David A. Fennell, 2015 Ecotourism continues to be embraced as the antithesis of mass tourism because of its promise of achieving sustainability through conservation mindedness community development education and learning and the promotion of nature based activities that were sensitive to both ecological and social systems The extent to which this promise has been realised is open to debate Focusing on an array of economic social and ecological inconsistencies that continue to plague ecotourism in theory and practice the volume examines ecotourism in reference to other related forms of tourism impacts conservation sustainability education and interpretation policy and governance and the ethical imperative of ecotourism as these apply to the world s greenest form of tourism Ecotourism is a growing field attracting increasing attention from students and academics Fennell provides an authoritative and comprehensive review of the most important issues that continue to both plague ecotourism and make it one of the most dynamic sectors in the tourism industry It covers a comprehensive range of themes and geographical regions

Building on the success of prior editions Ecotourism has been revised throughout to incorporate recent research and benefits from the introduction of real life case studies and summaries of recent literature An essential reference for those interested in Ecotourism the book is accessible to students but retains the depth required for use by researchers and practitioners in the field New chapters on the theory and application of animal ethics community development in sustainable tourism and education and learning in the field have added further value to an already very comprehensive volume This book will be of interest to students across a range of disciplines including geography economics business ethics biology and environmental studies

Routledge Handbook of Ecotourism David A. Fennell,2021-09-21 This handbook presents a timely broad ranging and provocative overview of the essential nature of ecotourism The chapters will both advance the existing central themes of ecotourism and provide challenging and divergent observations that will thrust ecotourism into new areas of research policy and practice The volume is arranged around four key themes sustainability ethics and identity change conflict and consumption and environment and learning with a total of 28 chapters The first section focuses on sustainability as a core ecotourism criterion with a primary focus on some of the macro sustainability issues that have an impact on ecotourism Foremost among these topics is the linkage to the UN s Sustainable Development Goals which have relevance to ecotourism as one of the greenest or most responsible forms of tourism The chapters in the second section provide a range of different topics that pull ecotourism research into new directions including a chapter on enriching indigenous ecotourism through culturally sensitive universalism The third section includes chapters on topics ranging from persons with disabilities as a neglected body of research in ecotourism to ecotourism as a form of luxury consumption The final section emphasises the link between ecotourism and learning about the natural world including a deeply theoretical chapter on rewilding Europe
