Williams,2019-12-31 In his account of the relationship between France the UK and the US Andrew Williams successfully intertwines diplomatic history with international thought We are presented with a historical stage that includes both the doers and the thinkers of the age and as a result this is a must read for both diplomatic historians and historians of international thought The second in a multivolume study this volume takes the story beyond the fall of France into the war years the period of post war reconstruction and the Cold War As with the first volume Williams is an excellent guide stepping over the ruins of past worlds and introducing us to an epoch with more than its fair share of both visionaries and villains Yet in this second volume the stakes are higher as the United States comes to terms with its role as the paramount world power Britain faces a world that challenges its imperial order and France is picking up the pieces from its defeat Lucian Ashworth Memorial University Canada Following on from his outstanding first volume reviewing the complex interwar relationships between France Britain and the United States Williams second volume is an indispensable and lucid overview of the vitally important era of post war reconstruction From national post war developments to institutional structures and superpower shifts Williams examines clearly and engagingly the final passing of pre modern
