Educating By Design Creating Campus Learning Environments That Work:

Educating by Design C. Carney Strange, James H. Banning, 2001 Authors C Carney Strange and James H Banning are nationally recognized experts on campus environments They draw from decades of research and experience to present an integrated framework for assessing and understanding academic environments They describe the principles and concepts that define effective person environment interactions and examine how these principles work through four different environmental components physical aggregate organizational and socially constructed They also discuss the four conditions for successful learning inclusion safety involvement and community

Designing for Learning C. Carney Strange, James H. Banning, 2015-06-16 Understand the design factors of campus environmental theory that impact student success and create a campus of consequence Designing for Learning is a comprehensive introduction to campus environmental theory and practice summarizing the influence of collegiate environments on learning and providing practical strategies for facilitating student success through intentional design This second edition offers new coverage of universal design learning communities multicultural environments online environments social networking and safety and challenges educators to evaluate the potential for change on their own campuses You ll learn which factors make a living learning community effective and how to implement these factors in the renovation of campus facilities An updated selection of vignettes case scenarios and institutional examples help you apply theory to practice and end of chapter reflection questions allow you to test your understanding and probe deeper into the material and how it applies to your environment Campus design is no longer just about grassy quads and ivy covered walls the past decade has seen a surge in new designs that facilitate learning and nurture student development This book introduces you to the many design factors that impact student success and helps you develop a solid strategy for implementing the changes that can make the biggest difference to your campus Learn how environments shape and influence student behavior Evaluate your campus and consider the potential for change Make your spaces more welcoming inclusive and functional Organize the design process from research to policy implementation Colleges and universities are institutions of purpose and place and the physical design of the facilities must be undertaken with attention to the ways in which the space s dimensions and features impact the behavior and outlook of everyone from students to faculty to staff Designing for Learning gives you a greater understanding of modern campus design and the practical application that brings theory to life

Creating Campus Cultures Samuel D. Museums, Uma M. Jayakumar, 2012-03-12 Many colleges and universities have not engaged in the critical self examination of their campuses necessary for effectively serving racially diverse student populations This timely edited collection provides insights into how campus cultures can and do shape the experiences and outcomes of their increasingly diverse college student populations By cultivating values beliefs and assumptions that focus on including validating and creating equitable outcomes among diverse undergraduate students an institution can foster their success While attention to campus climate is critical for gauging the

nature of an institution's culture and how students are experiencing the campus environment changes in climate alone will not lead to holistic and deep rooted institutional transformation. Moving beyond previous explorations of campus racial climates, *Creating Campus Cultures* addresses the considerable institutionally embedded obstacles practitioners face as they attempt to transform entrenched institutional cultures to meet the needs of diverse student bodies. A broad range of chapters include voices of students, new research, practical experiences and application of frameworks that are conducive to success. This book will help student affairs and higher education administrators navigate this increasingly difficult terrain by providing practical advice on how to foster success among racial minority students and enact long term holistic change at any institution.

Student Growth and Development in New Higher Education Learning Spaces Siok Kuan

Tambyah, 2022-11-30 Learning spaces are an increasing area of debate in higher education studies as universities attempt to develop holistic forms of education that connect epistemological areas. Focusing on faculty student collaborative learning in residential colleges in Singapore, this book carefully examines how we can enable students to grow and develop not just as workers for the global marketplace but also as unique individuals. Showcasing the diversity of programs and initiatives that contribute to student learning outcomes, the volume draws upon the real world experiences of educators and students. Contributors examine the benefits and challenges of crafting and implementing innovative programs and activities focused on the technologies of learning, interdisciplinary thinking, experiential learning, community engagement and authenticity. Students working with one another, their teachers and community partners also play a pivotal role in co-creating their learning journeys. The chapter authors provide their critical reflections on how the experiences and lessons learnt may apply to other learning spaces in higher education including online and blended spaces. This edited volume will be relevant to any educator, researcher or student interested in creative learning spaces and innovative programmes and activities that bring together students, educators and community partners.

Teacher Transition into Innovative Learning Environments

Wesley Imms, Thomas Kvan, 2020-11-30 This open access book focuses on how the design and use of innovative learning environments can evolve as teaching practices and education policies change. It addresses how these new environments are used, how teachers are adapting their practices, the challenges that these changes pose and the effective evaluation of these changes. The book reports on emerging research in learning environments with a particular emphasis on how teachers are transitioning from traditional classrooms to innovative learning environments. It offers a significant evidence based global assessment of current research in this field by designers, architects, educators and policy makers. It presents twenty five cutting edge projects from researchers in fifteen countries. Thanks to the book's comprehensive international perspective which combines theory and practice in a single publication, readers will gain a wealth of new insights.

The Translational Design of Universities, 2019-08-12 Whilst schools are transforming their physical and virtual environments at a relatively glacial pace in most countries across the globe, universities are under extreme pressure to adapt to the rapid emergence of

the virtual campus Competition for students by online course providers is resulting in a rapidly emerging understanding of what the nature of the traditional campus will look like in the 21st century The blended virtual and physical technology enabled hybrid learning environments now integrate the face to face and online virtual experience synchronously and asynchronously Local branch campuses are emerging in city and town centres and international branch campuses are growing at a rapid rate There is increasing pressure at various levels i e the city the urban and the campus to create formal and informal learning spaces as well as re purposing the library and social or third spaces Many new hybrid campus developments are not based on any form of rigorous scholarly evidence The risk is that many of these projects may fail In taking an evidence based approach this book seeks to align with the model of translational research from medical practice using a modified translational design approach The majority of the chapter material comes from the scholarly work of doctoral graduates and their dissertations This book is the second in a series on the evidence based translational design of educational institutions with the first volume focussing on schools This volume on Higher Education covers the city to the classroom and those elements in between It also explores what the future might look like as judgements are made about what works in campus planning and design in our rapidly changing virtual and physical worlds Contributors are Neda Abbasi Ronald Beckers Flavia Curvelo Magdaniel Mollie Dollinger Robert A Ellis Kenn Fisher Barry J Fraser Kobi Jacov Haina Rifca Hashimshony Leah Irving Marian Mahat Saadia Majeed Jacqueline Pizzuti Ashby Leanne Rose Munro Mahmoud Reza Saghafi Panayiotis Skordi Alejandra Torres Landa Lopez and Ji Yu

Cases on Higher Education Spaces: Innovation, Collaboration, and Technology Carpenter, Russell G.,2012-12-31 Higher education spaces are undergoing radical transformations in an attempt to respond to the needs of 21st century learners and a renewed interest in collaboration that spans beyond the walls of departments colleges and libraries Cases on Higher Education Spaces Innovation Collaboration and Technology highlights key innovations and collaborative ventures in space design from across campuses and institutions Including writing and communication centers studios libraries digital media labs learning commons and academic learning spaces this collection is ideally suited for university and professional administrators [Exploring Informal Learning Space in the University](#) Graham Walton,Graham Matthews,2017-09-01 Growing student numbers increased student expectations new approaches to learning and fast paced technological advances all contribute to the need for universities to take a more strategic approach to their buildings including formal and informal learning spaces Exploring Informal Learning Space in the University addresses the issue of informal learning space from the perspectives of a comprehensive range of stakeholders including students academics facilities managers university managers IT managers architects interior designers and librarians With contributions from a range of experts practitioners and academics around the world this book uses a combination of case studies and theoretical discussion to explore the rationale and theory of informal learning space alongside the practicalities of its planning development and utilization The volume is at once ambitious and pragmatic

combining innovative thinking with a firm awareness of practicalities including the varied constraints faced by universities and the need to work in tandem with broader strategies Advocating broad collaboration at both planning and delivery stage the result is essential reading for anyone involved in the delivery of learning space provision from architects and designers to university managers and strategists It will also be of particular interest to academics researchers and postgraduate students engaged in the study of library information science or higher education policy and strategy **College Services** ,2001
