regime and accelerated marginalization of Muslims in today's scenario due to open discrimination, mob violence, lynching and hate crimes in the name of various communal issues. Please note Taylor Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka. Indian Muslims Riaz Hassan, 2016-10-17. Research shows that Indian Muslims experience higher levels of development and equity deficits. Indian Muslims are also predicted to become the largest Muslim population in the world by 2050. This increase in numbers might exacerbate their relative deprivation, creating a disjunction between India's constitutional promises of equality of opportunity for citizens of a secular democracy, including for minorities, and the existential reality. This will create social and political conditions that could undermine the stability of the country's democracy and make Indian Muslims a security threat, which would have not only national but also global ramifications. This book examines the struggle for equality of citizenship of Indian Muslims in light of the release of the Sachar Committee report of 2006, which sparked widespread awareness of socioeconomic disparity and exclusion of religious minorities in India, especially Muslims. The contributors are some of the most eminent social scientists in the fields of applied economics, politics, sociology, and demography who work on Indian issues. The Indian state and its political infrastructure have been relatively successful thus far in countering the challenges presented by the diversity of its population. India therefore has the capacity and the ability to deal with these new challenges given the political and collective will. Islamic Studies Series Volume 22 Contemporary Issues and Challenge in Early Childhood Education in the Asia-Pacific Region Minyi Li, Jillian Fox, Susan Grieshaber, 2016-10-26. This book investigates the unique and dynamic approaches to key issues of changing images of child and childhood by different countries in the Asia Pacific. Key concepts considered are re-conceptualizing early childhood education and care, re-examining early learning standards, and redefining professionalism. The Asia Pacific region includes countries belonging to both the Majority and Minority worlds and which vary widely in terms of their cultural geography, social cultural beliefs, and levels of development, demographic profiles, political systems, and government commitments to early childhood services. An international team of experienced researchers from different countries guarantees diverse perspectives. By examining different countries' policy choices and evidence-based practices, the authors show how best to provide for young children based on their countries' strategies. **Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set)** Union of International Associations, 2014-06-16.
