Partnerships are now pervasive in global education and development but are they creating equitable cooperative and positive relationships Through case studies of prominent multistakeholder partnerships including the Education Cannot Wait Fund and Global Partnership for Education as well as a comprehensive analysis of the global education network this book exposes clear power imbalances that persist in the international aid environment The author reveals how actors and organizations from high income countries continue to wield disproportionate influence while the private sector holds a growing degree of authority in public policy circles In light of such evidence this book questions if partnerships truly ameliorate power asymmetries or if they instead reproduce the precise inequities they are meant to eliminate The use of partnerships for international aid and development has become ubiquitous and their value has been too little questioned For education Francine Menashy s book remedies this with a detailed probing analysis of such partnerships in theory and practice From the Foreword by Steven J Klees University of Maryland International Aid to Education is an urgent read for anyone working in international development Menashy s work points to ways in which all of us working in research policy and practice can rethink our own roles in perpetuating power imbalances and inequities Sarah Dryden Peterson Harvard Graduate School of Education Francine Menashy s new book provides a fresh and innovative take on power and politics within multistakeholder partnerships in international development It makes a strong new contribution to the study of global governance and education policy Karen Mundy chief technical officer Global Partnership for Education **Dictionary Catalog of the National Agricultural Library** National Agricultural Library (U.S.),1967 **Energy Law in Taiwan** Anton Ming-Zhi Gao,2021-05-20 Derived from the renowned multi volume International Encyclopaedia of Laws this book provides a systematic approach to legislation and legal practice concerning energy resources and production in Taiwan The book describes the administrative organization regulatory framework and relevant case law pertaining to the development application and use of such forms of energy as electricity gas petroleum and coal with attention as needed to the pervasive legal effects of competition law environmental law and tax law A general introduction covers the geography of energy resources sources and basic principles of energy law and the relevant governmental institutions Then follows a detailed description of specific legislation and regulation affecting such factors as documentation undertakings facilities storage pricing procurement and sales transportation transmission distribution and supply of each form of energy Case law intergovernmental cooperation agreements and interactions with environmental tax and competition law are explained Its succinct yet scholarly nature as well as the practical quality of the information it provides make this book a valuable resource

for energy sector policymakers and energy firm counsel handling cases affecting Taiwan It will also be welcomed by researchers and academics for its contribution to the study of a complex field that today stands at the foreground of comparative law
