A graphic CDI shows your position at the center of the indicator, relative to the desired course (the moving course deviation needle). As with a traditional analog CDI, when you're off course simply steer toward the needle. The CDI arrow in the center of the scale indicates whether you are heading to (arrow) the waypoint or if you have passed the waypoint (arrow is down arrow).

NOTE The GMC 425 always registers PD as supported unless the USB switch is set (preventing automatic disconnection), or you have turned the last component in your Back view.
