The Education of Native and Minority Groups Ambrose Caliver, Annie Reynolds, Cline Morgan Koon, David Segel, James Frederick Abel, Katherine Margaret (O'Brien) Cook, Lloyd E. Blauch, United States. National Survey of the Education of Teachers, Florence Evan Reynolds, 1932      **Teaching the World's Teachers** Lauren Lefty, James W. Fraser, 2020-07-07

Examining teacher education in an international context this book captures the diversity of the world's educators. Many countries confront surprisingly similar challenges in preparing K-12 educators for success while national contexts also make for surprising differences. In *Teaching the World's Teachers* education historians Lauren Lefty and James W. Fraser and their contributors make a convincing case for approaching these shared challenges from a more global and historically minded perspective. Written by education scholars from eleven different countries: Argentina, Brazil, Catalonia, Spain, China, England, Finland, Ghana, Israel, Singapore, South Africa, and the United States, this book provides histories of teacher education reforms between roughly 1980 and 2020. The authors show how international trends that emerged during this period collided with national and regional contexts to produce unique teacher education systems in different nations. While in some countries the embrace of markets and competition led to a deregulation of the teacher preparation field, in others teaching became a highly regulated and centralized affair. At the same time, ideas and structural models cross borders and education leaders borrow from each other while reshaping plans in each place. Opening with a broad historical overview of global teacher education models beginning in the late eighteenth century, *Teaching the World's Teachers* argues that the field has long been characterized by cross-border connections but shaped by geopolitical hierarchies of power. In an era when teacher quality is widely recognized as one of the most important factors in a child's education, this volume encourages dialogue among teacher educators and policymakers around the world. By understanding the context and contingency of where we have been, the authors hope that readers will walk away with a more empowered sense of where we are headed in the all-important task of teaching the world's teachers.

**Changing the Status Quo** Scott D. Wurdinger, 2018-01-23. Have you ever wondered where the ever-expanding layers of bureaucracy are taking us in the field of education? This book challenges us to think carefully about this question. The status quo in education consists of policies, practices, and power structures impacting the way we teach and prevent students from learning in meaningful and significant ways. Assessment techniques drive our teaching practices, resulting in a learning process that students strongly dislike. Technology like PowerPoint presentations and clickers force students to pay attention to lectures, but the end result is the same: memorizing information for exams. It is causing students to become less focused on comprehending what they read. It is also physically changing the way students read, focusing on small sound bites on what

they believe is necessary to remember for tests Discriminating against students of color continues to be a prevalent problem as well Data show that white educators consist of a huge majority often lacking cultural awareness in our classrooms Reading this book will inspire you to become a courageous educator and implement meaningful changes in your classroom on how to assess your students what kind and how much technology to use and how to sensitively treat educators and students of color
