Education and Technology David W. Kritt, Lucien T. Winegar, 2007-12-05 There are numerous publications about education and technology What is missing is a balanced appraisal of the values and cognitive skills technology promotes and those it devalues This is important for education because the way we teach influences how children think and it is of more general importance for the evolution of society If we wait until these issue are definitively resolved and have noticeable societal effects it will inevitably be too late Hence the need for informed debate now **Education and Technology** David W. Kritt, Lucien T. Law School 2.0 David I. C. Thomson, 2009 Legal education is at a crossroads As a media saturated generation of students enters law school they find themselves thrust into a fairly backward mode of instruction much of which is over 100 years old Over those years legal education has resisted many credible reports recommending change most recently those from the Carnegie Foundation for the Advancement of Teaching and from the Clinical Legal Education Association Meanwhile the cost of legal education continues to skyrocket with many law students graduating with crushing debt they have difficulty paying back All of these factors are likely to reach a crescendo in the next few years setting the stage for a perfect storm out of which can come significant change But legal education has successfully resisted systemic change for many years Given that dubious track record the only way significant change can reasonably be predicted is if something is different this time Fortunately there is something different this time the ubiquity of technology Since the MacCrate report in 1992 the internet has achieved massive growth and a generation of students has grown up with sophisticated and pervasive use of technology in nearly every facet of their lives This book describes how the perfect storm of generational change and the rising cost and criticisms of legal education combined with extraordinary technological developments will change the face of legal education as we know it today Its scope extends from generational changes in our students to pedagogical shifts inside and outside of the classroom to hybrid textbooks all the way to methods of active interactive and hypertextual learning And it describes how this shift can and will better prepare law students for the practice of tomorrow The Social and Cultural Impact of Foot and Mouth Disease in the UK in 2001 Martin Döring, Brigitte Nerlich, 2009-10-15 The 2001 Foot and

Mouth Disease epidemic in the UK during which millions of animals were culled over a nine month period had a devastating and long lasting impact on individuals and communities In 2002 the European Parliament noted that policymakers need to have a better understanding of the social and psychological impact of such events on adults and children on farmers and non farmers Although many studies about FMD have been published since 2001 this is the first to offer a detailed examination of the various ways in which the outbreak affected the fabric of rural life and rural culture across classes and across generations Drawing on the experiences of farmers the media artists writers children and churches this collection provides a space for academic inquiry political and poetic reflection and artistic expression **Learning Futures** Keri Facer,2011-03-29 Drawing on ten years of research into educational innovation incorporating scientists teachers students industry professionals and policy makers this book challenges the often adopted notion of a single linear educational future Considering alternative strategies for conceptualising the future of education Facer takes into account the challenges that future decades may face **Tech High** Canadian Centre for Policy Alternatives,1997 **Annual Meeting Program - American Educational Research Association** American Educational Research Association,1997 *NACADA Journal* ,2006 **Futures the Journal of Forecasting, planning and policy** ,1997 Annual Meeting Program American Educational Research Association,2000 **Advanced Educational Technology: Research Issues and Future Potential** Thomas T.
