(In)Security: Identifying the Invisible Disruptors of Security Gitanjali Adlakha-Hutcheon, Candyce Kelshall, 2024-10-12

What does it take to disrupt security How does one disrupt the invisibility of insecurity How does one make the invisible factors that define and impact security visible For a start by giving voice to the unheard and the marginalized engaging non traditional understandings of security that might bring to light the cracks in our current security infrastructure and expose the insecurities that are hidden in plain sight These voices include generational geographic cultural ethnic and gender based perspectives of insecurity which are ignored or simply cannot be heard by traditional notions of security Presently there is a lack of understanding of the language of nuanced hate being whispered from the ground that inform civil discord These call for new intrastate actions that need to be taken to make communities safer and building layers of protective resilience into the continuing existence of the state Unresolved grievances lay the foundation for insecurity and instability for the future at a time when states need cohesiveness more than ever and there are significant invisible insecurities external to the state that need to be revealed The tapestry of interrelationships that enable security within a state requires equity access and agency among communities If we are to achieve this we must learn to see the invisible listen to the unheard and move beyond our static conceptions of security In so doing we build more resilient societies in the face of a dynamic threat environment and ensure the peaceful continued existence of states This book is a sounding board for positive disruption a source for alternative theories tools and models to aid mitigation of the whispered threats and the soft violence which accompanies chauvinism of any one way of being In this edited book the multiplicity of factors that impact security is explored through new lenses to glean insights such that we are better equipped to prevent harm and protect our security Contested Multilateralism 2.0 and Asian Security Dynamics Kai He, 2020-04-28 In the 1990s there was a wave of multilateralism in the Asia Pacific led primarily by ASEAN Since the Global Financial Crisis of 2008 however many non ASEAN states have attempted to seize the initiative including the USA Japan China South Korea and Australia Kai He and his contributors debate the reasons for this contested multilateralism and the impacts it will have on the region s security and political challenges Will the Indo Pacific turn be a blessing or a curse for regional stability and prosperity Using a diverse range of theoretical and empirical perspectives these leading scholars contribute views on this question and on the diverse strategies of the great and middle powers in the region This collection will be of great interest to scholars and students of international relations in the Asia Pacific and of great value to policy makers in the region and beyond *Globalising the Regional, Regionalising the Global: Volume 35, Review of International Studies* Rick Fawn, 2009-04-30 A collection of leading international scholars examine the concept of regions from a range of perspectives and assess leading contemporary examples *Working Through Setbacks in Psychotherapy* Rob Leiper, Rosemary Kent, 2001-12-20 Counsellors and psychotherapists often encounter difficult situations with clients for which they feel ill prepared At any stage in the process a client may experience

a crisis or set back in their progress or simply be unable to move beyond a certain point Working through Setbacks in Psychotherapy is therefore intended to help therapists respond to such events which form major obstacles to the successful development and maintenance of the therapeutic relationship The authors present a framework for understanding the problems that arise and offers effective guidance for working through difficult situations which test the skills of even the most experienced practitioners Until now little has been written about the *Climate Change and European Security* Richard Youngs, 2014-10-10 It is now commonly asserted that climate change will fundamentally change international relations It has been predicted that global warming will increase conflict within and between states intensify food insecurity menace the global trading system and unleash waves of migration As a result governments are beginning to incorporate these warnings into their foreign policy initiatives The appropriateness of their incipient responses needs to be examined in finer detail This book looks at the impact of climate change on European Union EU security policy It explores how governments are reconfiguring their geo strategy and broader international relations in the wake of climate change warnings The book demonstrates that although many aspects of EU foreign policies have begun to change climate security is not yet accorded unequivocal or sufficient priority In doing so Youngs argues that if climate change policies are to have significant effect they can no longer be treated as a separate area of policy but must be incorporated into the more mainstream debates pertinent to EU common foreign and security policy CFSP This book will be of key interest to students scholars and practitioners of climate change and policy energy and environmental policy EU governance and foreign policy European studies international relations geography security studies policy and environmental economics
