Dynamic Modeling Bruce Hannon,Matthias Ruth,2001-01-05 The book uses STELLA software to develop simulation models thus allowing readers to convert their understanding of a phenomenon to a computer model and then run it to yield the inevitable dynamic consequences built into the structure Part I provides an introduction to modeling dynamic systems while Part II offers general modeling methods Parts III through VIII then apply these methods to model real world phenomena from chemistry genetics ecology economics and engineering A clear approachable introduction to the modeling process of interest in any field where real problems can be illuminated by computer simulation *Journal of Economic Literature* ,2004

A Systems Approach to Modeling the Water-Energy-Land-Food Nexus, Volume II Bernard Amadei,2019-02-13 This two volume book describes a flexible and adaptive system based methodology and associated guidelines for the management and

allocation of community based WELF resources Over the next 50 years rapid population urbanization and economic growth worldwide will create unprecedented demands for water energy land and food WELF resources The discussion on how to meet human needs for WELF resources and how to guarantee their respective securities has changed over time from looking at all four sectors in isolation to understanding their interdependency through the so called WELF nexus The approach presented in this book responds to the overall agreement in the WELF nexus literature that the management and allocation of WELF resources at the community level need to be examined in a more systemic multidisciplinary participatory and practical manner while seeking to increase synergies and reduce trade offs This book was written to explore the value proposition of that approach This two volume book describes a flexible and adaptive system based methodology and associated guidelines for the management and allocation of community based WELF resources Volume 1 focuses on defining the landscape in which the nexus operates and outlines the proposed methodology Volume 2 explores the quantitative and qualitative modeling of the nexus and landscape using system modeling tools including system dynamics It presents a road map for the formulation simulation selection and ranking of possible intervention plans The proposed methodology is designed to serve as a guide for different groups involved in the science and policy decision aspects of the WELF nexus within the context of community development The methodology focuses mostly on WELF related issues in small scale and low income communities where securing resources is critical to their short and long term livelihood and development
