## **Dynastic Identity Early Modern Europe:**

Dynastic Identity in Early Modern Europe Liesbeth Geever, Mirella Marini, 2016-04-29 Aristocratic dynasties have long been regarded as fundamental to the development of early modern society and government Yet recent work by political historians has increasingly questioned the dominant role of ruling families in state formation underlining instead the continued importance and independence of individuals In order to take a fresh look at the subject this volume provides a broad discussion on the formation of dynastic identities in relationship to the lineage s own history other families within the social elite and the ruling dynasty Individual chapters consider the dynastic identity of a wide range of European aristocratic families including the Cro s Arenbergs and Nassaus from the Netherlands the Guises Lorraine of France the Sandoval Lerma in Spain the Farnese in Italy together with other lineages from Ireland Sweden and the Austrian Habsburg monarchy Tied in with this broad international focus the volume addressed a variety of related themes including the expression of ambitions and aspirations through family history the social and cultural means employed to enhance status the legal religious and political attitude toward sovereigns the role of women in the formation and reproduction of composite dynastic identities and the transition of aristocratic dynasties to royal dynasties In so doing the collection provides a platform for looking again at dynastic identity in early modern Europe and reveals how it was a compound of political religious social cultural historical and individual attitudes

*Elite Women and the Italian Wars, 1494-1559* Susan Broomhall, Carolyn James, 2024-04-11 The Element analyses the critical importance of elite women to the conflict conventionally known as the Italian Wars that engulfed much of Europe and the Mediterranean between 1494 and 1559 Through its considered attention to the interventions of women connected to imperial royal and princely dynasties the authors show the breadth and depth of the opportunities roles impact and influence that certain women had to shape the course of the conflict in both wartime activities and in peace making The work thus expands the ways in which the authors can think about women s participation in war and politics It makes use of a wide range of sources such as literature art and material culture as well as more conventional text forms Women s voices and actions are prioritized in making sense of evidence and claims about their activities

Transregional Lordship and the Italian Renaissance Matthew Vester, 2025-10-01 Ren de Challant whose holdings ranged from northwestern Italy to the Alps and over the mountains into what is today western Switzerland and eastern France was an Italian and transregional dynast The spatially dispersed kind of lordship that he practiced and his lifetime of service to the house of Savoy especially in the context of the Italian Wars show how the Sabaudian lands neighboring Alpine states and even regions further afield were tied to the history of the Italian Renaissance Situating Ren de Challant on the edge of the Italian Renaissance helps us to understand noble kin relations political networks finances and lordship with more precision A spatially inflected analysis of Ren s life brings to light several themes related to transregional lordship that have been obscured due to the traditional tendencies of Renaissance studies It uncovers an Italy whose boundaries extend not just into

the Mediterranean but into regions beyond the Alps
