Previous research points out that physical e-research collaboration meetings play a relevant role. This chapter explores whether this requirement of physical meetings in e-research collaboration is independent of the scale and complexity of the collaboration established. The findings suggest that high complexity can be achieved using communication tools if the scale of the group is small while very large groups can collaborate using communication tools if their target is a loose collaboration. However, if the collaboration involves both a large group and a considered complexity of collaboration, establishing a balance between communication tools with the requirement of physical meetings becomes a relevant issue. *American Cooperation* American Institute of Cooperation, 1927. 1968 include Land Grant University Conference on Farmers Cooperatives Papers.
