

Engine identifying features

- A** The M52 engine (MY97-98 528i) used a single on-off variable intake valve timing system (called VANOS). The cylinder block is cast iron and the cylinder head is aluminum. The engine management system is Siemens MS 41.1 and features NGK-type (0-5 volt) oxygen sensors.

NOTE—

VANOS is an acronym based on the German words Variable Nockenwellen Steuerung (variable camshaft timing).

- A** The M52 TU engine (MY99-00 528i) and the M54 engines (MY01-02 525i/530i) are fitted with double VANOS. The engine blocks are constructed of aluminum alloy with cast iron cylinder sleeves.

- A** The double VANOS (variable camshaft control) system incorporates true variable control of both the intake and exhaust camshafts, as compared to the single VANOS system on the M52 engine (on/off control of the intake camshaft only).

The M54 engines use a fully electronic throttle control (drive by wire). There is no accelerator cable connecting the throttle pedal to the throttle housing in these cars.
