Start services are designed to be responsive to each child's and family's ethnic cultural and linguistic heritage. The Congressionally mandated Head Start Impact Study was conducted across 84 nationally representative grantee/delegate agencies. Approximately 5,000 newly entering 3 and 4 year old children applying for Head Start were randomly assigned to either a Head Start group that had access to Head Start program services or to a non Head Start group that could enrol in available community non Head Start services selected by their parents. Data collection began in fall 2002 and is scheduled to continue through 2006 following children through the spring of their 1st grade year.
