Static and Dynamic Finite Element Analysis Using Parallel Programming on GPU with OpenCL 卞卞,2014

Static and Dynamic Finite Element Analysis Using Parallel Programming Allan Mann,2015-11-25 The Graphics Processing Units GPU were originally designed for downloading graphical display but with the improved capabilities of GPU the use of GPU for General Purpose Programming GPGPU has been noticed Due to the parallel architecture which allows the concurrency of the tasks GPU can be used for solving large systems of equations Implementation of the Finite Element Method on GPU architecture is quite straightforward because this method deals with linear equations or ordinary differential equations and when a problem has a large number of degrees of freedom the use of GPU capabilities can significantly decrease the computation time Two specific examples are the transient analysis and the static analysis which can reach higher performance using parallel programming

Seismic Safety of High Arch Dams Houqun Chen,Shengxin Wu,Faning Dang,2015-11-10 Written for civil structural and geotechnical engineers this book presents the latest research and practical experience in the design of high arch dams in seismically active regions from an author team that is highly active and experienced in the design development and construction of 300m high arch dams The book covers the entire subject of dam design for seismic regions including seismic input mechanisms and modeling non linear analysis techniques for dam structure and foundations concrete material properties and simulation techniques for dam design Of particular value are the real world experimental data and design case studies that enhance the book and ensure that readers can apply the theoretical content to their own projects Break through the conventional concepts in civil engineering discipline and focus on applying new techniques from other subject fields to seismic safety on high arch dam design in an innovative way Shows how to model and evaluate seismic safety of dams using seismic input dam response and dynamic resistance Summarizes the methodology and approaches applied to high arch dam design and construction in China demonstrates the selection of site specific seismic input parameters and enables the reader to apply this to their own specific design challenge
