Dynamic Programming And Stochastic Control Volume 125 Mathematics In Science And Engineering:

Ship Motion Control Tristan Perez, 2006-03-30 engineers into a single volume whilst concentrating on two important research control design problems autopilots with rudder roll stabilization and fin and combined rudder fin stabilization He has been guided by some of the leading marine control academics in particular Mogens Blanke and Thor Fossen indeed Chapters 3 and 4 on kinematics and kinetics of ship motion are jointly authored with Professor Fossen There are some 240 cited references an invaluable resource for interested readers The volume is likely to appeal to a wide range of readers who will each be able to extract something different from the various parts of the monograph Part I has some four chapters on the modelling fundamentals including kinematics dynamics and actuators Part II is a very useful survey of the ship roll stabilization problem and how ship roll performance is measured and assessed This clearly motivates the human necessity for roll reduction and roll stabilization Parts III and IV move on to the control systems aspects of the various stabilization designs Valuable material here includes a study of system performance limitations as caused by the presence of non minimum phase characteristics and actuator saturation Chapter 10 has an interesting historical review of these marine control problems stretching back some thirty years into the 1970s

Multiple Use of Forests and Other Natural Resources F. Helles, Per Holten-Andersen, Lars Wichmann, 2001-11-30 This volume comprises eighteen papers dealing with the theory and application of modern decision making and management planning of multiple use of forestry and other natural resources in the landscape Generally an economic approach is used as implemented by operations research methods but broader contexts are applied too e g ecosystem management discounting preference analysis and policy formulation The volume is aimed at researchers students and practitioners in management of forestry and other natural resources
