The author examines issues of confidence and self esteem, explores the coping strategies adopted by children and adults with dyslexia, investigates the concept of dyslexia friendly schools, studies how children were first identified as having dyslexia and the social and emotional difficulties they encountered, offers guidance on how teachers and parents can best support children with specific learning difficulties, considers the cognitive, educational, social and emotional perspectives in order for teachers and parents to gain a better understanding of dyslexia. This new edition provides an updated account of cognitive research and examines important changes in relation to Special Educational Needs policy and practice in the last ten years, including the Revised SEN Code of Practice 2001, *Removing Barriers to Achievement* 2004 and the National Literacy Strategy 2006. *Living with Dyslexia* recognises that the voices of children with dyslexia are increasingly important in developing good educational practice and makes an important contribution to the literature on dyslexia.
