

## Chapter 2: Advanced Configuration

After setting up the Router with the setup software (located on the CD-ROM), the Router will be ready for use. If you would like to change its advanced settings, use the Router's browser-based utility. This chapter describes each web page of the utility and each page's key functions. You can access the utility via a web browser on a computer connected to the Router.

The browser-based utility has these main tabs: *Setup*, *Wireless*, *Security*, *Access Restrictions*, *Applications & Gaming*, *Administration*, and *Status*. Additional tabs will be available after you click one of the main tabs.

### How to Access the Browser-Based Utility

To access the browser-based utility, launch the web browser on your computer, and enter the Router's default Internet Protocol (IP) address, **192.168.1.1**, in the Address field. Then press **Enter**.

**NOTE:** You can also access the browser-based utility on Windows computers by entering the device name in the Address field. Refer to *Device Name* under "**Router IP**" on page 7.

A login screen will appear. (Non-Windows 7 users will see a similar screen.) Leave the User name field blank. Then enter the password you set up during the setup software. (If you did not run the setup software, then use the default password, **admin**. You can set a new password on the **Administration > Management** screen. Refer to "**Administration > Management**" on page 25.) Click **OK** to continue.

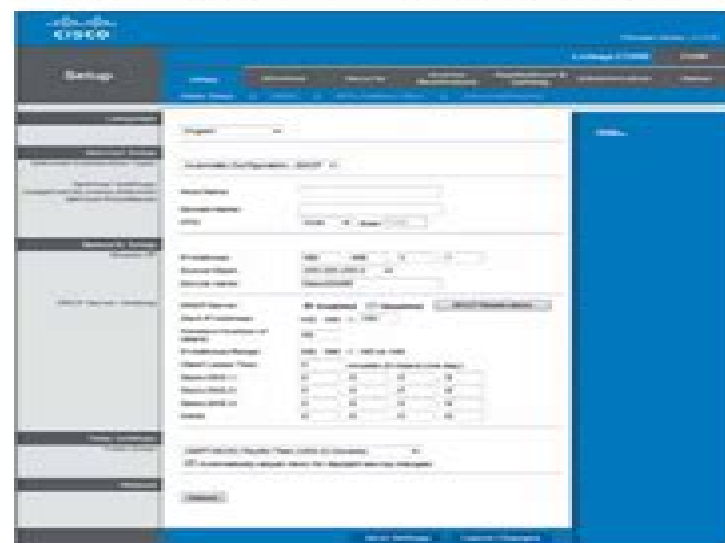

Login Screen

**NOTE:** You can also access the browser-based utility through Cisco Connect. For more information, refer to "**Router Settings**" on page 10.
