Young Adult Science Fiction Charles William Sullivan,1999-03-30 At the close of the nineteenth century American youths developed a growing interest in electricity and its applications machines and gadgetry When authors and publishers recognized the extent of this interest in technology they sought to create reading materials that would meet this market need The result was science fiction written especially for young adults While critics tended to neglect young adult science fiction for decades they gradually came to recognize its practical and cultural value Science fiction inspired many young adults to study science and engineering and helped foster technological innovation At the same time these works also explored cultural and social concerns more commonly associated with serious literature Nor was young adult science fiction a peculiarly American phenomenon authors in other countries likewise wrote science fiction for young adult readers This book examines young adult science fiction in the U S and several other countries and explores issues central to the genre The first part of the book treats the larger contexts of young adult science fiction and includes chapters on its history and development Included are discussions of science fiction for young adults in the U S and in Canada Great Britain Germany and Australia These chapters are written by expert contributors and chart the history of young adult science fiction from the nineteenth century to the present The second section of the book considers topics of special interest to young adult science fiction Some of the chapters look at particular forms and expressions of science fiction such as films and comic books Others treat particular topics such as the portrayal of women in Robert Heinlein s works and representations of war in young adult science fiction Yet another chapter studies the young adult science fiction novel as a coming of age story and thus helps distinguish the genre from science fiction written for adult readers All chapters reflect current research and the volume concludes with extensive bibliographies

Time machine: Utopia or Science Fiction Kristijan Zrinski,2013-06-26 Seminar paper from the year 2012 in the subject Didactics for the subject English Literature Works grade 3 0 University of Trier language English abstract This

term paper deals with the question which literary genre does *The Time Machine* by H G Wells fit best into. Should it be seen as a dystopian novel or should it be rather classified as a science fictional one and why is it so hard to classify. As the novel shows characteristics for either genres the novel has to be analysed accurately. In order to do so and find an answer to the main question I will point out and examine relevant passages in the text which will help classifying Wells' work. Therefore it is essential to first of all define both literary genres. These definitions are to include the origin of the genre, main characteristics as well as appropriate background information. As already mentioned the definitions will be followed by an in depth analysis of significant text passages. Finally my conclusion is intended to sum up the most important findings and aims to present a classification based on the analysis in the main part.

The Intersection of Science Fiction and Philosophy Robert Myers, 1983-11-22 Robert E Myers has assembled a collection of essays which explore aspects of the relationship between science fiction and philosophy. Contributing authors focus on significant issues, questions and ideas that penetrate to the center of our individual and social conceptions of human existence and affect the ways in which we attempt to comprehend our world, ourselves and others. The authors bring to this study the insights of diverse disciplines: philosophy, social science, poetry, linguistics, future studies, medical humanities and literature. Dealing exclusively with topics relating to science fiction and philosophy they offer an initial exploration of the philosophical problems within science fiction and their implications. **Utopian Studies**, 1993 **Positions and Presuppositions in Science Fiction** Darko Suvin, 1988 In this major theoretical survey of contemporary authors of science fiction Suvin argues for a radically new approach which considers science fiction as neither prophecy nor the folklore of technology but as parables for our times.
