tasks she notes that the phenomenal popularity of Peg Bracken's 1960 cookbook *The I Hate to Cook Book* attests to the limitations of this kind of indoctrination. At the same time she explores the proliferation of bachelor cookbooks aimed at the man in the kitchen and the biases they display about male and female abilities, tastes and responsibilities. Neuhaus also addresses the impact of World War II rationing on homefront cuisine, the introduction of new culinary technologies, gourmet sensibilities and ethnic foods into American kitchens and developments in the cookbook industry since the 1960s. More than a history of the cookbook, *Manly Meals and Mom's Home Cooking* provides an absorbing and enlightening account of gender and food in modern America.

Roles and Challenges of Semantic Intelligence in Healthcare Cognitive Computing Antonella Carbonaro, Fernando Ortiz-Rodriguez, Valentina Janev, 2024-01-15. The data that must be processed in healthcare includes text, numbers, statistics and images and healthcare systems are continuously acquiring novel data from cutting edge technologies like wearable devices. Semantic intelligence technologies such as artificial intelligence, machine learning and the internet of things together with the hybrid methodologies which combine these approaches are central to the development of the intelligent knowledge based systems now used in healthcare. This book *Roles and Challenges of Semantic Intelligence in Healthcare Cognitive Computing* explores those emerging fields of science and technology in which cognitive computing techniques offer the effective solutions poised to impact healthcare in the foreseeable future, minimizing errors and improving the effectiveness of personalized care models. The book assesses the current landscape and identifies the roles and challenges of integrating cognitive computing techniques into the widespread adoption of innovative smart healthcare solutions. Each chapter is the result of collaboration by experts from various domains and provides a detailed overview of the potential offered by new technologies in the field. A wide spectrum of topics and emerging trends are covered reflecting the multidisciplinary nature of healthcare and cognitive computing and including digital twins, explainable AI, AI based decision support systems in intensive care and culinary healthcare as well as the semantic internet of things, SIoT, natural language processing and deep learning and graph models. The book presents new ideas which will facilitate collaboration among the different disciplines involved and will be of interest to all those working in this rapidly evolving field.
