Djsig Dod Joint Security Implementation Guide:

Dod-Joint Special Access Program (Sap) Implementation Guide (Jsig) Syber LLC,2019-05-03 Special Access Programs represent some of the Department's most sensitive information and must be protected accordingly. We can no longer rely on physical isolation as a primary risk mitigation strategy. Threats and risks often outpace our ability to implement robust multi-disciplinary countermeasures. Cost and timelines to develop threats to our data almost always pale to the cost and time to implement countermeasures. Given the rapid increase in cybersecurity threats and prioritization from the SECDEF, the senior cybersecurity professionals responsible for authorizing information systems to process SAP have identified three security controls which offer mitigations so significant they can no longer be tailored. Beginning in this revision of the JSIG, we are introducing controls that are not tailorable. Historically, the ability to tailor controls has been delegated to the field, but senior leadership is no longer willing to accept the risk of high volume data loss. Recognizing there may be extreme situations in which it is not feasible to implement these controls in their entirety, the authority to tailor or modify these controls is delegated to the component SAP senior authorizing official. This waiver authority cannot be further delegated. The establishment of a senior authorizing official for each DoD component will elevate the status of cybersecurity functions so they more effectively influence department-wide strategy, policy, and investments. The Risk Management Framework (RMF) is a framework designed to be tailored to meet organizational needs while providing adequate risk management of data and information systems. Transformation to the RMF is a daunting task, and we appreciate all the effort to date within the Department and Industry. We applaud all the hard work of the Joint SAP Cybersecurity Working Group, JSCS WG, and the spectacular leadership of the individuals who created this joint coalition of the willing.

Cybersecurity in Context Chris Jay Hoofnagle, Golden G. Richard, III, 2024-08-07 A masterful guide to the interplay between cybersecurity and its societal, economic, and political impacts, equipping students with the critical thinking needed to navigate and influence security for our digital world. JOSIAH DYKSTRA Trail of Bits A comprehensive multidisciplinary introduction to the technology and policy of cybersecurity. Start here if you are looking for an entry point to cyber. BRUCE SCHNEIER author of A Hacker's Mind How the Powerful Bend Society's Rules and How to Bend Them Back The first ever introduction to the full range of cybersecurity challenges. Cybersecurity is crucial for preserving freedom in a connected world. Securing customer and business data, preventing election interference, and the spread of disinformation and understanding the vulnerabilities of key infrastructural systems are just a few of the areas in which cybersecurity professionals are indispensable. This textbook provides a comprehensive student-oriented introduction to this capacious interdisciplinary subject. Cybersecurity in Context covers both the policy and practical dimensions of the field. Beginning with an introduction to cybersecurity and its major challenges, it proceeds to discuss the key technologies which have brought cybersecurity to the fore, its theoretical and methodological frameworks, and the legal and enforcement dimensions of the subject. The result is a cutting edge guide to all

The Complete DOD NIST 800-171 Compliance Manual Mark a Russo Cissp-Issap Ceh,2019-10-07 ARE YOU IN CYBER COMPLIANCE FOR THE DOD UNDERSTAND THE PENDING CHANGES OF CYBERSECURITY MATURITY MODEL CERTIFICATION CMMC In 2019 the Department of Defense DoD announced the development of the Cybersecurity Maturity Model Certification CMMC The CMMC is a framework not unlike NIST 800 171 it is in reality a duplicate effort to the National Institute of Standards and Technology NIST 800 171 with ONE significant difference CMMC is nothing more than an evolution of NIST 800 171 with

elements from NIST 800 53 and ISO 27001 respectively The change is only the addition of third party auditing by cybersecurity assessors Even though the DOD describes NIST SP 800 171 as different from CMMC and that it will implement multiple levels of cybersecurity it is in fact a duplication of the NIST 800 171 framework or other selected mainstream cybersecurity frameworks Furthermore in addition to assessing the maturity of a company s implementation of cybersecurity controls the CMMC is also supposed to assess the company s maturity institutionalization of cybersecurity practices and processes The security controls and methodologies will be the same the DOD still has no idea of this apparent duplication because of its own shortfalls in cybersecurity protection measures over the past few decades This is unfortunately a reflection of the lack of understanding by senior leadership throughout the federal government This manual describes the methods and means to self assess using NIST 800 171 However it will soon eliminate self certification where the CMMC is planned to replace self certification in 2020 NIST 800 171 includes 110 explicit security controls extracted from NIST s core cybersecurity document NIST 800 53 Security and Privacy Controls for Federal Information Systems and Organizations These are critical controls approved by the DOD and are considered vital to sensitive and CUI information protections Further this is a pared down set of controls to meet that requirement based on over a several hundred potential controls offered from NIST 800 53 revision 4 This manual is intended to focus business owners and their IT support staff to meet the minimum and more complete suggested answers to each of these 110 controls The relevance and importance of NIST 800 171 remains vital to the cybersecurity protections of the entirety of DOD and the nation
