Roggenkamp, Verena Huber-Dyson, 2006-11-15 **Separable Algebras over Commutative Rings** Frank De Meyer, Edward Ingraham, 2006-11-15 These lecture notes were prepared by the authors for use in graduate courses and seminars based on the work of many earlier mathematicians In addition to very elementary results presented for the convenience of the reader Chapter I contains the Morita theorems and the definition of the projective class group of a commutative ring Chapter II addresses the Brauer group of a commutative ring and automorphisms of separable algebras Chapter III surveys the principal theorems of the Galois theory for commutative rings In Chapter IV the authors present a direct derivation of the first six terms of the seven term exact sequence for Galois cohomology In the fifth and final chapter the authors illustrate the preceding material with applications to the structure of central simple algebras and the Brauer group of a Dedekind domain and they pose problems for further investigation Exercises are included at the end of each chapter **Integral Representations and Applications** Klaus W.
