The Family Emotional System Robert J. Noone,, Daniel V. Papero, 2015-10-30 The Family Emotional System An Integrative Concept for Theory Science and Practice presents an ongoing dialogue among scientists family investigators and clinicians related to a natural systems view of the family and human behavior that has been occurring over several decades The concept of the family as an emotional system as defined in Bowen theory is presented as the principal integrative concept underlying this dialogue and an effort to move toward a science of human behavior As a natural system the family forms the immediate and most important context for individual development and may be the most central and important environment shaping brain development across the lifetime of the individual This book explains how the family system can serve as an integrative framework within which specific factual discoveries and hypotheses from many areas of science can be brought together and understood as various manifestations of a coherent whole The Family Emotional System provides understanding of what is entailed in conceptualizing the family as an emotional system a sense of the breadth and depth of knowledge the sciences are contributing to this effort and examples of how this theoretical framework contributes to family research and practice The richness and excitement occurring in the ongoing dialogue between scientists and Bowen family systems practitioners and researchers is captured along with the promise it holds for the study of human behavior

Metaphors of Family Systems Theory Paul C. Rosenblatt, 1994 If family therapy is like a camera through which clients are able to view their lives then the treatment method used by clinicians could be considered the lens offering different ways of seeing In Metaphors of Family Systems Theory Paul C Rosenblatt explores the metaphors of family systems theory that form the conceptual foundation the lens of a great deal of therapy research theory education and policy making in the family field He demonstrates the value of testing out theoretical or alternative metaphors other lenses to provide new perspectives and a fresh means of gaining clarity The literature that informs family therapy is rich with striking accounts of how therapeutic metaphors have helped to move families into healthier energizing freeing and more satisfying relationships yet little attention has been devoted to the development of alternative theoretical metaphors This innovative new work investigates the uses and limitations of the standard metaphors of family systems theory Perhaps more important it also provides the means to generate alternative theoretical metaphors to stimulate new thinking about family systems Rosenblatt

asserts that the capacity to recognize metaphors will enable clinicians and clients to identify biases hidden implications and reification as well as what may have been overlooked He shows the way this ability also helps us to organize and remember information and to better appreciate the multilayeredness of reality Initial chapters define metaphor and discuss family systems theory as well as the uses and limitations of standard therapeutic metaphors The chapters examine the notion of the family as an entity the metaphor of system and the major systemic metaphors Rosenblatt extends his analysis to the idea of family boundary and to the closely related metaphors of family subsystem family boundary permeability and family boundary ambiguity He also analyzes the metaphors of family structure systems control family rules and negative and positive feedback Later chapters apply these ideas to the metaphors of communication therapeutic goals the therapist in the system and family response to intervention Rosenblatt illustrates new insights with a variety of experience based metaphors and presents strategies for the evaluation and development of new theoretical metaphors for family systems Unique and innovative this book offers a fresh perspective for anyone working with metaphors of family systems theory Of special interest to family therapists family researchers social workers and other mental health professionals working in the family field it is especially useful as a text for courses in family systems theory theories of family therapy and theory construction
