McIlwain,2003 Based on a foundation of cultural theory and scholarship the author explores a variety of issues related to race culture and death ritual practices by immersing himself in the rich narratives and sources of information gleaned from his in depth interviews with funeral directors corporate funeral home representatives clergy and individuals who have recently lost a loved one Additionally he has observed numerous funeral and burial services and cemetery landscapes and has examined federal and state public policies surrounding burial and disposal as well as other forms of death related discourse Ultimately the book describes how death rituals both manifest and reinforce different cultural identities and suggests that perhaps it is through the experience of death that we might find the most enduring possibilities for promoting greater cultural understanding by maintaining rather than eliminating such differences BOOK JACKET      International Perspectives on Family Support Walter Hellinckx,M. J. Colton,Margaret Williams,1997 Family centred programmes comprise one of the fastest growing programme areas in child welfare This book provides an international overview of family support and preservation programmes with attention both to the general situation with respect to family preservation in different countries and specific types of intervention such as video home training

Czerwinski, 2003 *Nursing Care of the Pediatric Trauma Patient* provides the most comprehensive coverage available on nursing care of the pediatric trauma patient. Ideal for both emergency and trauma nurses, this reference discusses pediatric trauma across the continuum of care. This provides a broad perspective that enables the reader to use a systems approach that is consistent with the current health care environment. The book is organized into three sections. The first section, *The Scope of Pediatric Trauma*, covers issues such as epidemiology, prevention, and outcomes management. The second section, *Clinical Concepts*, covers issues such as mechanism of injury, pre-hospital care, initial resuscitation, rehabilitation, pain management, nutrition, family-centered care, and violence. Section Three, *System Injuries*, addresses specific body system issues and sequelae of trauma. Comprehensive content focuses specifically on nursing care of the pediatric trauma patient. The nurse's role in the continuum of care is consistent with the emphasis of the current healthcare environment. The organizational framework focuses on the systems approach and is divided into four sections. The section on *The Scope of Pediatric Trauma* covers issues such as epidemiology, prevention, outcomes management, and ethical issues. The *Clinical Concepts* section addresses mechanism of injury, pre-hospital care, initial resuscitation, rehabilitation, pain management, nutrition, family-centered care, and violence. The section on *System Injuries* covers specific body system issues. The section on *Multisystem Issues* covers thermal and submersion injuries as well as the unborn infant as trauma victim and sequelae of trauma. Independent and collaborative nursing interventions are emphasized in the *System Injuries* section. Timely issues such as outcomes management are discussed. Chapters written by nurses practicing in pediatric trauma ensure clinically relevant up-to-date content.

**Handbook of Family Development and Intervention** William C. Nichols, 2000-02-25 Like all complex living systems, a family during its life course proceeds through predictable stages of development. Yet every family is different, its uniqueness defined and continually redefined by an open-ended array of structural, biological, and sociocultural variables. And as with all living things, a family's continued well-being depends upon its ability to adapt to changes arising from both within the family system and without. First postulated in the 1940s, these basic ideas constitute the conceptual core of modern family development theory. From them has blossomed an impressive body of knowledge about family health and illness without which much of the progress occurring in family therapy over the past half century would not have been possible. This book does much to promote continued progress in the practical application of family development theory by affording family therapists an unparalleled opportunity to acquaint themselves with the most important trends in family development theory to emerge over the past decade. In it, you will find contributions from leading theorists, researchers, and clinicians arranged so as to provide a systematic treatment of the latest thinking on family development seen from both the systemic viewpoint and that of individual members of the system. Comprehensive in scope, this book explores the patterns, processes, and dynamics inherent in traditional families as well as in important structural variants such as single-parent and gay and lesbian families and families with special needs and problems including divorce, physical abuse, and disabilities. Since

progress in the social sciences is as much about formulating viable new ways of seeing as it is about determining quantifiable facts the editors offer equal time to an array of influential and sometimes radically conflicting schools of thought including sociobiology social psychology constructionism multiculturalism postmodernism and feminism Mainstream family therapists will find much in this handbook that they will consider controversial In some cases readers may even be outraged by the views expressed Yet thanks to the high caliber of scholarship intellect and professionalism evidenced throughout none of the ideas advanced in Handbook of Family Development and Intervention can be easily dismissed and all have something of value to offer the thoughtful dedicated family therapist Handbook of Family Development and Intervention is a valuable professional resource for all couples and family therapists It is also must reading for graduate students in family psychology family therapy social work and counseling In this magnificent volume the editors make a major contribution that integrates individual and family development concepts and therapeutic applications by bringing together scholarly yet fresh contributions The inclusion of various family forms and of families with special needs makes this volume especially relevant to the treatment of contemporary families as we enter the new millennium This superb Handbook should be mandatory reading and an excellent reference for teachers researchers and therapists at all levels of development Celia J Falicov PhD President 1999 2001 American Family Therapy Academy *Family Therapy* George Thorman, 1997 This comprehensive book provides a theoretical framework for understanding the dynamics of family disorders and establishes ways in which therapists can make an accurate evaluation develop an effective treatment plan and use specific skills in assisting troubled families The author stresses how family therapy can improve and strengthen parent child relations The role of the therapist as an agent of change is viewed as essential in improving relationships among family members and restoring healthy functioning within the family system The serious issues of domestic violence and child abuse are discussed as symptoms of disorder within the family structure that can be altered to prevent and eliminate destructive violent behavior The problem of incest is also analyzed why and how it develops in certain families and how family therapy can intervene to provide a safe family environment for victims of sexual abuse Social workers therapists and other concerned professionals engaged in the practice of family therapy will find this book to be an exceptionally useful guide for helping the families they serve in times of serious overwhelming stress California.
